Although you might see many sites listing a few variations of 1570 series depending on complications (ie: 1575 with a date; 1575 GMT with a date and GMT hand; 1580 which is anti-magnetic and used in the Milgauss), the truth is that many caliber 1570 movements have the date.

How fast does a caliber 1570 beat?

The caliber 1570 beats at 19.8KBPH, which is much slower than the 28.8KBPH of the 3135. Technically, the 1570 is very similar to the iconic and well-known 3135. They both feature a free-sprung balance, and hairspring overcoil, however, the 3135 feature some upgrades - one of which is the beat frequency. The 1570 has a wolf's teeth clutch wheel.

It"s entirely possible to see a 1530 with a 1570 rotor bridge, or a 1520 with a 1555 rotor bridge, or any other strange combination. In this instance, the movement is actually a 1575 (for which the 1570 rotor bridge is correct), and I suspect it"s there because something unfortunate happened to the original (probably rust).
