

2025 senior engineer of energy storage

When is the 2025 IEEE energy storage & stationary battery Conference?

The 2025 IEEE Energy Storage & Stationary Battery (ESSB) Committee Winter meeting and the 2025 Electrical Energy Storage Applications & Technology (EESAT) Conference are being held together (co-located) this year in Charlotte, NC the week of January 20 through 24, 2025.

What is the future of energy storage?

Storage enables electricity systems to remain in balance despite variations in wind and solar availability, allowing for cost-effective deep decarbonization while maintaining reliability. The Future of Energy Storage report is an essential analysis of this key component in decarbonizing our energy infrastructure and combating climate change.

Why was the energy storage roadmap updated in 2022?

The Energy Storage Roadmap was reviewed and updated in 2022 to refine the envisioned future states and provide more comprehensive assessments and descriptions of the progress needed (i.e., gaps) to achieve the desired 2025 vision.

Should energy storage be co-optimized?

Storage should be co-optimized with clean generation, transmission systems, and strategies to reward consumers for making their electricity use more flexible. Goals that aim for zero emissions are more complex and expensive than net-zero goals that use negative emissions technologies to achieve a reduction of 100%.

The government says that deploying 20 GW of low duration energy storage could save the electricity system \$24bn (US\$31bn) between 2025 and 2050, reducing energy bills as additional cheaper renewable energy would be available to meet demand at peak times, and cutting reliance on natural gas to plug the gaps.

Energy and climate-related policies have been accelerated by both state and federal governments, and for many companies the time feels right to invest in energy storage. This event gathers together investors, developers, IPPs, grid operators, policymakers, utilities, energy buyers, service providers, consultancies and technology providers under one roof.
