

7750 movement energy storage

What is the Valjoux 7750 movement?

In layman's terms, the movement pertains to the gears that make your watch tick. It's like the engine that powers your timepiece. If you dig in a little deeper, you would notice that most watch enthusiasts are partial to the Valjoux 7750, also known as "the world's greatest chronograph movement".

What is the ETA 7750 movement?

That movement is the ETA 7750 or, as it was formerly and still commonly known, the Valjoux 7750. It is a movement that inspires heated debate among watch connoisseurs, equally revered and ridiculed. But no one can deny the impact this movement has had on the watch industry.

How does a 7750 start-stop-reset work?

The start-stop-reset functions of the chronograph are controlled by a layered switching cam, which is manufactured through a simple stamping process, similar to many other parts of the 7750 movement. This cam is responsible for making and breaking the connection between the movement and the chronograph.

Why was the 7750 so popular?

The architecture of the 7750 lent itself to easier mass-production than did column wheel calibres -- but by the mid-'70s quartz was king and there wasn't the call for a high volume of mechanical chronographs and the movement remained largely dormant.

How does a Cal 7750 work?

The basic version of the cal. 7750 has semi-instantaneous digital date and day-of-the-week indicators that can be rapidly reset via the crown. Capt and his team positioned the chronograph hour-accumulating wheel (driven directly by the barrel) on the front.

What is a 7750 caliber?

The same is true for the caliber "7750". The four-digit code stands for the chronograph caliber with coulisse-lever escapement from Valjoux (named after its origin, the Vallée de Joux). With a power reserve of 42 hours and a frequency of 28,800 vibrations per hour, at first glance, the movement does not knock you off your feet.

El calibre 7750 es un movimiento automático para cronógrafos que se conoce como ETA 7750 o Valjoux 7750. El fabricante suizo de movimientos Valjoux es especialista en movimientos de alta calidad para cronógrafos desde hace más de 100 años. El calibre 7750 es utilizado por muchas marcas de relojes muy conocidas como Breitling, Alpina, IWC o TAG Heuer. El Valjoux 7750 ...

ETA's Valjoux 7750 - the most widely used, if not loved, Swiss chronograph movement. The Valjoux 7750 family is the most popular automatic chronograph movement, yet it's not universally loved. It's dismissed for its mass-produced, low-tech cam-based design and utilitarian look, yet the Valjoux 7750 is also one of the most reliable and widely-used ...

Le succès du mouvement est alors rapidement au rendez-vous et cela pour plusieurs raisons. Le calibre ETA 7750 Valjoux comprend alors 240 composants, soit 10% de moins que son concurrent El Primero, qui a certes une fréquence beaucoup plus élevée (36 000 alternances pour le El Primero contre 21 600 ou 28 800 pour le Valjoux), mais un peu moins d'autonomie, ...

Several popular movements have been added: the workhorse ETA 2824-1 and -2, the ubiquitous ETA Valjoux 7750 chronograph, the large diameter ETA Unitas 6497-1 and -2, and the ETA Peseux 7001. ... which probably helped Mr Capt optimise the energy usage in the movement, one of the features that would help make it so adaptable to additional ...

Movement is an integral part of animal biology. It enables organisms to escape from danger, acquire food, and perform courtship displays. ... We examine evidence for elastic energy storage and associated changes in the efficiency of movement across vertebrates and invertebrates, and hence across a large range of body sizes and diversity of ...

Any watch connoisseur worth their salt knows that the Valjoux 7750--now known as ETA 7750--is probably the most popular automatic chronograph movement of all time. First introduced during the 1970s, at the peak of the quartz crisis, the movement offers a durable and inexpensive design, which is quite easy to mass-produce.

The ETA Valjoux 7750 chronograph movement is well-known in the world of watchmaking for being tough, reliable, and versatile. Since it was first introduced in the early ...

Hello everyone, I wanted to know more about other peoples experience with the Asia 7750 movement. In general, is it reliable, or would it be smarter to stick to a non-chrono movement like the Swiss ETA 2824-2 movement for around the same price. Is there any noticeable difference with the smoothne...

Here's a nice article with pictures and info about the 7750: The Valjoux 7750 Chronograph - Part 1 - TimeZone A great number of chronos use the ETA 7750 movement these days and I was under the impression that it would be a budget movement that offers acceptable accuracy but nothing to get excited about. Then, after sending it in for a light ...

L'ETA Valjoux 7750 è nato nel 1974 per mano del Maestro Edmond Capt. Questo movimento è il Cronografo meccanico automatico tra i più diffusi al mondo. Tuttavia, pare derivi dalla versione a carica manuale Valjoux 7733 a sua volta derivato del Venus 188. Il mercato all'epoca era così fermo, che la produzione venne sospesa l'anno successivo, ma vennero conservati comunque ...

History. The 7750 is derived from the manually-wound Valjoux 7733 chronograph movement, itself a descendent of the Venus 188, a company Valjoux purchased in 1966 was designed (partially on computer, an industry first) by Edmond Capt.. Introduced on July 1, 1974, at the height of the quartz crisis, the 7750 was released five years after the race ...

L'ETA 7750, spesso chiamato "Valjoux 7750", è uno dei movimenti automatici per cronografi più iconici e ampiamente utilizzati nel mondo dell'orologeria. Esaminiamo la storia, le caratteristiche e le curiosità su questo rinomato movimento. Storia L'ETA 7750 è prodotto dalla ETA SA Manufacture Horlogère Suis ...

Il 7750 è stato parzialmente progettato su un computer, il primo per l'industria dell'orologeria. Il 7750

7750 movement energy storage

è dotato di un modulo automatico a carica automatica collegato alla parte superiore del movimento. Funziona con un'unica ruota a doppio scatto, che si carica in una sola direzione. Il 7750 misura 30 mm di diametro e 7,9 mm di spessore.

Currently there are two Chinese manufacturers producing 7750 clones: Shanghai (3L series) and Liaoning Peacock (4 series). Quite a few years ago I had the opportunity to sample various versions alongside a watch with an ETA 7750 movement. Unfortunately the Chinese watches were of the kind that are supplied with an uncoiled movement.

The venerable and humble Valjoux 7750 is the widespread beating heart of many self-winding-chronograph watches. As a result of groundbreaking engineering, it has proven to be an immortal movement that is easy to service, reliable, accurate, universally sized, heavily modifiable, and even cloned by movement manufacturer Sellita to make the SW-500 (to meet ...

I had an Oris automatic a few years ago. It had a standard ETA 2824 auto movement in it. I hand wound it every time I wore it, a couple times a week. Big mistake. Apparently the gear chain from the crown to the spring barrel on that movement is fairly weak - I inadvertently turned the crown gear into a crown washer...over time.

Watches that Use the Valjoux 7750 Movement. It is fairly easy to spot a watch that uses the Valjoux 7750 movement as it is one of the most famous calibres around. That being said, here are a few of our favourite models that you should definitely check out. Do note that some of these models contain a modified version of the Valjoux 7750 to ...

Like the venerable Mercedes 280 Diesels that have done time as third-world taxis and limousines alike, the Valjoux 7750 cannot be dismissed as a second-rate movement. It's ...

The cal 7750 was developed by Valjoux long before this merge-up. As Valjoux is now a part of ETA, what used to be the Valjoux 7750 is now the ETA 7750, with the same specs. Technically, only if it's a 7750

7750 movement energy storage

assembled before this merge up is a true Valjoux 7750. Else, simply call it the ETA/Valjoux caliber 7750. That makes the cal 7753 only an ...

Gerber used the 7750 as a base caliber, then added a second spring barrel to power the alarm, which was also wound by the movement's rotor, which was slightly enlarged and made heavier to wind two barrels efficiently. To create room for all this, Gerber raised the rotor 1.5 mm higher. This movement, named F-2001, was launched in 1998.
