The welding rod, also known as the filler rod, will fill the seam with melted plastic during the welding process. After the hot air tool has reached the desired temperature, insert the welding rod into the speed welding nozzle. While inserting the welding rod, apply slight downward pressure to feed the welding rod through the speed welding nozzle.

The rod is side mounted and uses a telescoping handle, allowing you to adjust the rod in width. You can even stack 2 units on top of one another for higher storage. This means it'll fit any closet with walls within that range. Note: This type of closet rod requires a ...

Bumps, scrapes, and falls won't damage these tough ABS filaments. Known for their durability, they absorb impact without cracking or breaking, and won't degrade when heated. Use them to print tool handles, storage cases, and other parts that are handled or dropped frequently. These filaments are a good place to start if you're experimenting with printing impact-resistant parts.
