Solar combined cycle with high-temperature thermochemical energy storage A small scale SCC with sensible energy storage based on a fluidised particle solar receiver was proposed in [22]. The solar share was highly enhanced (theoretically up to 100%) since high-temperature energy storage was proposed, while solar-to-electric efficiency was found ...

It is also the first Scaling Solar project to include solar energy storage requirements by pairing solar with batteries. The process began with feasibility studies conducted by IFC experts to ...

Food-Water-Energy Nexus in Antananarivo "Everything is challenging in Tana" [2]. In Antananarivo, few technical and financial partners intervene in the field of food, water and energy. In this urban context, the synergy of actors is still insufficient. Factors are many and diverse, which shows that development solutions can only
