In the German-based spelling, b is doubled after short vowels except in certain function words and when the letter is followed by another consonant within the word stem. In the syllable coda, the choice between b and p may be based on internal analogy, but more often follows the German cognate.; In the Dutch-based spelling, b is doubled after short vowels if ...

The &lt;b&gt; HTML element is used to draw the reader's attention to the element's contents, which are not otherwise granted special importance. This was formerly known as the Boldface element, and most browsers still draw the text in boldface. However, you should not use &lt;b&gt; for styling text or granting importance. If you wish to create boldface text, you should use ...

There are four major blood groups determined by the presence or absence of two antigens, A and B, on the surface of red blood cells. In addition to the A and B antigens, there is a protein called the Rh factor, which can be either present (+) or absent (-), creating the 8 most common blood types (A+, A-, B+, B-, O+, O-, AB+, AB-).
