

Why is China launching a national energy storage Industry Innovation Alliance?

[Photo/China News Service]China came up with a national energy storage industry innovation alliance on Monday aiming to further boost the country's energy storage sector,as the country aims to promote large-scale use of energy storage technologies at lower costs to back up the world's biggest fleet of wind and solar power plants.

Why is China embracing new-type energy storage?

The new-type energy storage sector is embracing massive opportunities in China as the country has been promoting storage technologies in accordance with a massive wind and solar capacity build-out to allow exports of large-scale clean energy to other regions,Li said.

What is China's energy storage strategy?

Localities have reiterated the central government's goal of developing an integrated format of "new energy +storage" (such as "solar +storage"),with a required energy storage allocation rate of between 10% and 20%. China has created an energy storage ecosystemwith players throughout the supply chain.

How much energy storage capacity does the energy storage industry have?

New operational electrochemical energy storage capacity totaled 519.6 MW/855.0 MWh (note: final data to be released in the CNESA 2020 Energy Storage Industry White Paper). In 2019, overall growth in the development of electrical energy storage projects slowed, as the industry entered a period of rational adjustment.

Will China's energy storage investment be disregarded in transmission pricing audit?

The May policy set clear that the energy storage investment by the power grid companies-- the largest investors in China's electricity sector--will be disregardedin the transmission pricing audit. Soon after the policy,series of battery storage projects under planning were stranded,as grids ceased new investment.

Is 2019 a good year for lithium-ion energy storage?

Domestically,however,2019 was a year of setback. The country as a whole produced some 3.8GWh lithium-ion energy storage cell,which increased by 26.7% year-on-year. The growth,however,mainly thanks to the international market. Whereas sales for the domestic market,just 0.7GW,plummeted 75% YoY last year.
