

Cairo energy storage general contracting company

How can Egypt store electricity?

Egypt has been looking at a number of ways to store electricity as part of its ambitions to grow renewable energy capacity to cover 42% of the country's electricity needs by 2030. These include upgrading its power grid and incorporating pumped-storage hydroelectricity stations to help store electricity for future use.

Can batteries solve Egypt's Electricity oversupply problem?

Egypt is exploring the potential of energy storage through batteries to combat our electricity oversupply problem: As Egypt continues to suffer from a major oversupply of electricity, the country is in need of new ways to tackle the issue.

Will EGP 2 trillion be needed in Egypt's energy sector?

The International Finance Corporation (IFC) believes that EGP 2 Trillion are required to be brought into Egypt's energy sector in climate-smart investments by 2030. Egypt is expected to overtake South Africa in the next decade to become the largest electricity market in Africa.

What is Egypt's investment law?

According to the Arab Republic's General Authority for Investment and Freezones, Egypt's Investment Law allows companies incorporated under its umbrella to enjoy a set of incentives and prohibits nationalisation, confiscation and freezing of assets and government interference in the pricing of companies' products.
