

Egypt's energy policy is helping to change the terms of the global debate on climate change by demonstrating that there is a basic compatibility between developing domestic natural gas resources and developing renewable energy sources. Disproving the dogma that natural gas and renewables are in a zero-sum competition, Egypt is advancing as a leader in ...

Leading officials from the energy ministry, institutional, regulatory and entrepreneurial agencies, as well as representatives of the academic and business community will, as always, be taking part in the upcoming "Renewable & Storage Forum" conference, the largest and most influential event in the country, on Renewable Energy Sources and ...

Solar & Storage Live MENA is a leading international trade fair in Cairo, focusing on the presentation of solar PV systems, storage solutions, and complementary technologies. Taking place at the Egypt International Exhibition Center (EIEC), the event showcases the growing importance of Egypt and the MENA region in the solar energy and energy ...

Europe and China are leading the installation of new pumped storage capacity - fuelled by the motion of water. Batteries are now being built at grid-scale in countries including the US, Australia and Germany. Thermal energy storage is predicted to triple in size by 2030. Mechanical energy storage harnesses motion or gravity to store electricity.

Egypt signed a letter of intent to join the Battery Energy Storage Systems Alliance (BESS), which is one of the main initiatives of the Global Energy Alliance for People and Planet (GEAPP) ...
