Can I add battery energy storage to my solar system?

Battery energy storage systems are a great addition to any solar panel installation. They allow you to store the excess solar energy generated during the day, and use it later on - even at night. You may be wondering if it is possible to add battery energy storage to your existing system. The short answer is yes it is possible.

Can I Retrofit a solar battery to an existing solar panel system?

Yes, it's easy to retrofit a solar battery to an existing solar panel system. Depending on the specifications of your existing system and how much storage capacity you require, we offer four sizes of batteries.

Can I add a backup battery to my solar system?

If you want to add a backup battery to your existing solar panel system, share the specifics of your system, your electricity use, and your storage objectives with your installer to determine what kind of system is the best fit for your home. How much does the installation labor cost for a backup battery?

Do you need a battery storage system?

But did you know that with a battery storage system, the solar power your panels produce can go even further, giving you renewable electricity, both day and night. Given the electricity from solar panels can't always be used immediately, a battery storage system helps ensure the electricity your panels produce won't be wasted.

Should I add a battery to my solar panel system?

By storing solar electricity onsite in a battery, you can avoid pulling expensive electricity from the grid when your solar panel system isn't generating enough power to meet your needs (like at night). Resiliency is another good reason to add a battery to your solar panel system.

Can you add a battery to a solar-plus-storage system?

Going back and adding a battery later isn't always an easy "plug and play" process - depending on the circumstance, upgrading to a solar-plus-storage system may involve swapping certain solar panel system components for new, battery-friendly alternatives. Plus, some batteries are much easier to retrofit onto a solar panel system than others.

If you're considering adding a battery to your solar system, here Chris Lovatt, Chief Operating Officer of E.ON Energy Infrastructure Services answers some of the questions you might have about solar battery retrofit. ... Save money on your energy bills ...

A professional can assess your energy needs and the amount of renewable energy available to you, and help you choose the appropriate battery bank size. They can also help you consider other factors, such as the type of battery technology to use and the charging and discharging rates of the batteries. With the right size battery
