DOI: 10.1016/j.solmat.2022.111977 Corpus ID: 252192531; Decorating CaO with dark Ca<sub>2</sub>MnO<sub>4</sub> for direct solar thermal conversion and stable thermochemical energy storage @article{Hu2022DecoratingCW, title={Decorating CaO with dark Ca<sub>2</sub>MnO<sub>4</sub> for direct solar thermal conversion and stable thermochemical energy storage}, author={Yingchao Hu and ...

The method using the sacrificed biological template provides an advanced approach to fabricate porous materials, and the composite CaO-based material provides high ...

Due to the inconsistency and intermittence of solar energy, concentrated solar power (CSP) cannot stably transmit energy to the grid. ... Zr-Stabilized, CaO-Based Composites under Different Thermal Energy Storage Modes. Jian Sun Shengbin Bai +4 authors Zijian Zhou. Materials Science, Engineering ... Calcium-Looping performance of mechanically ...

Shengbin Bai Jian Sun +7 authors Wenqiang Liu. ... The exploitation of solar energy, an unlimited and renewable energy resource, is of prime interest to support the replacement of fossil fuels by renewable energy alternatives. ... Experimental investigation on the CaO/CaCO<sub>3</sub> thermochemical energy storage with SiO<sub>2</sub> doping. Xiaoyi Chen Xiaogang ...

Solar energy is the most abundant renewable energy source, with the sun releasing energy at a rate of 2.3 × 10<sup>23</sup> kW, of which about 1.8 × 10<sup>14</sup> kW is received by the Earth [2]. Increasing the use of solar energy can help alleviate the energy crisis and reduce carbon emissions, which is the best option for mitigating the greenhouse effect.

Structurally improved, TiO<sub>2</sub>-incorporated, CaO-based pellets for thermochemical energy storage in concentrated solar power plants. Shengbin Bai, Jian Sun, +7 authors. ...

Semantic Scholar extracted view of "Enhanced Thermochemical Energy Storage Stability of CaO-Based Composite Pellets Incorporated with a Zr-Based Stabilizer" by Yue Zhou et al. ... {Yue Zhou and Zijian Zhou and Lei Liu and Xiang-yang She and Ruichang Xu and Jian Sun and Minghou Xu}, journal={Energy & Fuels}, year={2021}, url={https://api ...

Yongji Cao currently works at the Academy of Intelligent Innovation, Shandong University. His current

research interests include power system stability analysis and control, application of ...

Possessing nontoxicity, high thermochemical energy storage density, and good compatibility with supercritical CO<sub>2</sub> thermodynamic cycles, calcium carbonate (CaCO<sub>3</sub>) is a very promising candidate in ...

Cao Yu, Qi Wang, Yu Zhao, Xiaochao Ran, Gangqiang Dong, Chen-Wei Peng, Xinming Cao & Jian Zhou. ... Renewable Energy Conversion and Storage Center, Solar Energy Research Center, Nankai University ...

CaO-based materials are potential candidates for thermochemical energy storage in calcium looping (CaL) due to their low-cost and large theoretical heat storage capacity. The harsh energy storage ...

The reactions are, respectively, the reversible oxidation/reduction of MnO<sub>2</sub>/Mn<sub>2</sub>O<sub>3</sub> [23] in the oxides energy storage (OES), the largely investigated CaCO<sub>3</sub>/CaO reaction [31] in the carbonates energy ...

Request PDF | On Mar 30, 2022, Jian Sun and others published Evaluation of Thermochemical Energy Storage Performance of Fe-/Mn-Doped, Zr-Stabilized, CaO-Based Composites under Different Thermal ...

Calcium looping process (CaL) is a promising thermochemical energy storage technology for the application in the 3rd generation concentrated solar power plants (CSP). Hence, it is ...

CaCO<sub>3</sub>/CaO materials possess the advantages of low cost, high energy storage density, and working temperature, which offer these materials the potential to be used in thermochemical energy storage systems for concentrated solar power plants. However, CaCO<sub>3</sub>/CaO materials possess poor antisintering and optical absorption abilities, largely ...

@article{Cao2024DoublenetworkAE, title={Double-network aerogel-based eutectic composite phase change materials for efficient solar energy storage and building thermal management}, author={Feng Cao and Zaichao Li and Yuang Zhang and Linhai Zhu and JianRu Fan and Shufen Zhang and Bingtao Tang}, journal={Solar Energy Materials and Solar Cells ...

Semantic Scholar extracted view of &quot;Steam reactivation of spent CaO/CaCO<sub>3</sub> for thermochemical energy storage&quot; by Yingchao Hu et al. ... Published in Solar Energy 1 May 2023; Environmental Science, Engineering, Materials Science ... Zr-Stabilized, CaO-Based Composites under Different Thermal Energy Storage Modes. Jian Sun Shengbin Bai +4 authors ...

In recent years, CaO/CaCO<sub>3</sub> has attracted great attention in the field of thermochemical energy storage. However, due to its very low optical absorption, thermochemical energy storage materials made of pure CaO/CaCO<sub>3</sub> struggle to reach reaction temperatures when only absorbing solar energy directly in a calciner, making the overall system inefficient. ...

energy storage in concentrated solar power plants}, author={Yongqing Xu and Tai Zhang and Bowen Lu and Cong Luo and Fan Wu and Xiaoshan Li and Liqi Zhang}, journal={Energy Conversion and Management}, year={2021}, url={https://api ...

@article{Fang2017OptimalSO, title={Optimal sizing of utility-scale photovoltaic power generation complementarily operating with hydropower: A case study of the world's largest hydro-photovoltaic plant}, author={Wei-Hung Fang and Qiang Huang and Sheng Huang and Junliang Yang and Erhao Meng and Yunyun Li}, journal={Energy Conversion and ...

Economic and environmental concerns over fossil fuels encourage the development of photovoltaic (PV) energy systems. Due to the intermittent nature of solar energy, energy storage is needed in a ...

Some review papers relating to EES technologies have been published focusing on parametric analyses and application studies. For example, Lai et al. gave an overview of applicable battery energy storage (BES) technologies for PV systems, including the Redox flow battery, Sodium-sulphur battery, Nickel-cadmium battery, Lead-acid battery, and Lithium-ion ...

In this paper, a new battery/ultracapacitor hybrid energy storage system (HESS) is proposed for electric drive vehicles including electric, hybrid electric, and plug-in hybrid electric vehicles.

calcination of  $\text{CaCO}_3$  to produce  $\text{CaO}$  and  $\text{CO}_2$ , which converts solar energy into chemical energy in  $\text{CaO}$ . Baker et al. [33] pointed out that high calcination temperature was beneficial for the

Calcium looping process (CaL) is a promising thermochemical energy storage technology for the application in the 3rd generation concentrated solar power plants (CSP). Hence, it is necessary to develop the highly efficient  $\text{CaO}$ -based heat storage composite materials. The structurally improved,  $\text{CaO}$ -based pellets were prepared via adding cellulose as ...

Calcium looping is a potential thermochemical energy storage technology applied in a high-temperature working window. However,  $\text{CaCO}_3/\text{CaO}$  materials are prone to encounter severe sintering, exhibiting poor thermal energy storage/release stability. To improve the thermochemical energy storage stability, different amounts (5, 15, and 30 wt %) of a Zr ...
