

Lithium-ion batteries (LIBs) are widely used for energy storage due to their long lifespan and high energy density [1], [2], [3]. As one of the most popular cathode materials, LiCoO_2 (LCO) has garnered increased attention from academia and industry due to its high theoretical capacity (274 mAh g^{-1}), high volumetric energy density, and good Li^+ /electrons conductivity ...

Currently, Li-ion batteries (LIBs) are commercially successful energy storage devices due to high operation voltage, large energy capacity, long cycle life, and low self-discharge. 150, ... An Chen gained her bachelor's ...

Electrolyte design holds the greatest opportunity for the development of batteries that are capable of sub-zero temperature operation. To get the most energy storage out of the battery at low temperatures, improvements in electrolyte chemistry need to be coupled with optimized electrode materials and tailored electrolyte/electrode interphases. Herein, this ...

Siyu Chen received the B.S. degree from the Nanjing Institute of Technology, Nanjing, China, in 2021. He is currently pursuing the M.S. degree in electrical engineering with the School of Electrical Engineering, Chongqing University, Chongqing, China. His research focuses on reliability of press-pack insulated gate bipolar transistor (IGBT) ...

Performance Evaluation of Lower-Energy Energy Storage Alternatives for Full-Hybrid Vehicles; NREL (National Renewable Energy Laboratory) Conference · Tue Feb 11 00:00:00 EST 2014 · OSTI ID: 1483668

Chen and coworkers reported the first example of mechanically and electrically self-healing supercapacitors. 12 In this work, the healable electrodes were fabricated by spreading SWCNT thin films onto self-healing substrates, ... As for energy storage devices, self-healing supercapacitors and self-healing Li-ion batteries have been developed by ...

Energy storage has significant impacts on large-scale renewable energy grid integration, load shifting, postponing power grid constructions and improving power system ...

Thus, there is an urgent demand to build large-scale electrical energy storage systems (EESs) to store wind power, solar power, and other intermittent renewable energy resources. 1, ... Xiaoyang Chen received her B.S. degree (2018) from Zhengzhou University, China. She is currently pursuing a Ph.D. degree in Physical Chemistry at the College of ...

1 INTRODUCTION. Sodium-ion battery (SIB) has been considered as a potential alternative to lithium-ion

battery in the field of large-scale energy storage due to the abundant raw materials and low cost of Na. 1, 2 The development of high-performance electrode materials is still the main challenge for SIBs. 3, 4 As a kind of disordered and nongraphitized ...

DOI: 10.1016/j.apsusc.2022.155015 Corpus ID: 252529003; Solution-processable multicolor TiO₂/polyaniline nanocomposite for integrated bifunctional electrochromic energy storage device

5 · DNA nanotechnology has revolutionized materials science by harnessing DNA's programmable properties. DNA serves as a versatile biotemplate, facilitating the creation of ...

Thermal Energy Storage (TES) systems are pivotal in advancing net-zero energy transitions, particularly in the energy sector, which is a major contributor to climate ...

Moreover, gridscale energy storage systems rely on lithium-ion technology to store excess energy from renewable sources, ensuring a stable and reliable power supply even during intermittent ...

The increasing demand for energy storage is calling for improvements in cathode performance. In traditional layered cathodes, the higher energy of metal 3d over O 2p orbital results in one band ...

Siyu Zhao's 26 research works with 738 citations and 3,069 reads, including: Zn-Ion Batteries When It's Heavier: Interfacial and Solvation Chemistry of Isotopes in Aqueous Electrolytes for Zn-ion ...

Zhe Yang, Youyou Lu, Xiaojian Liao, Youmin Chen, Junru Li, Siyu He, Jiwu Shu, The 21st USENIX Conference on File ... Accelerating Distributed Object Storage with Open-Channel SSDs. ... (ICDCS'19), 2019 Paper; Cognitive SSD: A Deep Learning Engine for Energy-Efficient Data Retrieval. Shengwen Liang, Ying Wang, Youyou Lu, Zhe Yang, Huawei Li ...

As widely used for secondary energy storage, lithium-ion batteries have become the core component of the power supply system and accurate remaining useful life prediction is the key to ensure its reliability. ... Zhang et al., 2019e) and kernel smoothing (Chen et al., 2020a, Chen et al., 2020b). Multiple hidden variables are used in the ...

Notably, at an optimal composition of $x = 0.1$, the ceramic exhibits exceptional energy storage characteristics including an ultrahigh recoverable energy density (W_{rec}) of 5.05 J/cm³ and a high efficiency (η) of 82.56% at an electric field strength (E_b) of 540 kV/cm over a wide temperature range spanning from 30 to 100 °C and frequencies ...

This review systematically introduces the applications of Mn-based cathodes in energy storage systems, such as SCs, LIBs, ZIBs, SIBs, etc. The energy storage mechanisms and performance improvement methods of MnO_x-based materials in different devices were mainly discussed. Moreover, it also demonstrated the advantages, disadvantages, and future ...

Convection-enhanced Li-ion cells for high-power and energy-dense storage Novel microporous polymer separators for non-aqueous redox flow batteries Development of experimental and modeling approaches to forecast the performance and durability of utility-scale lithium-ion batteries and beyond

Zhuo Peng, Hanbo Zou, Wei Yang, Zhiwei Feng, Shengzhou Chen. Article 102697 View PDF. Article preview. select article Phenolic triamine dangling poly(VDF-co-HFP) anion exchange membrane for all aqueous organic redox flow battery ... select article Modelling aluminium energy storage systems comprising ionic liquid and aqueous electrolyte cells ...

Siyu Chen's 4 research works with 196 citations and 1,567 reads, including: Evaluation of realistic 95% confidence intervals for the activation energy calculated by the iterative linear integral ...

A hierarchical control algorithm for managing electrical energy storage systems in homes equipped with PV power generation. Y Wang, S Yue, M Pedram, L Kerofsky, S Deshpande. 2012 IEEE Green Technologies Conference, 1-6, 2012. 28: 2012: ... S Yue, L Chen, D Zhu, TM Pinkston, M Pedram.

Ziyan Yuan, Jingao Zheng, Xiaochuan Chen, Fuyu Xiao, Xuhui Yang, Luteng Luo, Peixun Xiong, Wenbin Lai, Chuyuan Lin, Fei Qin, Weicai Peng, Zhanjun Chen, Qingrong Qian, Qinghua Chen, Lingxing Zeng. In Situ Encapsulation of $\text{MoS}_x\text{Se}_{2-x}$ Nanocrystals with the Synergistic Function of Anion Doping and Physical Confinement with Chemical Bonding for ...

Siyu Chen's 7 research works with 58 citations and 1,280 reads, including: Population Aging Driven Slowdown in the Reduction of Economic Cost-Attributed to PM 2.5 Pollution after 2013 in China

DNA digital storage provides an alternative for information storage with high density and long-term stability. Here, we report the de novo design and synthesis of an artificial chromosome that encodes two pictures and a video clip. ... Weigang Chen 1, Mingzhe Han 2, Jianting Zhou 2, Qi Ge 1, Panpan Wang 1, Xinchun Zhang 2, Siyu Zhu 2 ...

Chen, L. et al. Outstanding energy storage performance in high-hardness $(\text{Bi}_{0.5}\text{K}_{0.5})\text{TiO}_3$ -based lead-free relaxors via multi-scale synergistic design. Adv. Funct.

High-capacity anode materials are one of the bottlenecks to further improve the energy density of Na-ion batteries (NIBs). Except for introducing more defects to increase the sloping capacity, tuning the closed porous structure to boost the plateau capacity is another direction. Here by adopting phenol-formaldehyde resin (PF) as the carbon precursor and ...

On Energy Storage Chemistry of Aqueous Zn-Ion Batteries: From Cathode to Anode. Xiujuan Chen; Wei Li; Xingbo Liu; Review article 16 September 2023 Article: 33 ... Qiqi Chen; Hui-Ming Cheng; Review Article 30 March 2023 Article: 15 Part of 1 collection: Lithium-Ion Batteries: A Never-Ending Story and Memory for

John B. Goodenough ...

Siyu Chen. Associate Professor. Curriculum Vitae. chensynus1220 Professional Experience. Associate Professor, 2023/10-, Institute for Economic and Social Research, Jinan University. Assistant Professor, 2019/09- 2023/09, Institute for Economic and ...

Currently, Li-ion batteries (LIBs) are commercially successful energy storage devices due to high operation voltage, large energy capacity, long cycle life, and low self-discharge. 150, ... An Chen gained her bachelor's degree in materials chemistry at Northeast Forestry University, China in 2018. She is studying for her master degree in ...
