A full cell via pairing high-capacity silicon anode with high-voltage NMC cathode (Li(NiCoMn)O) holds great promise as a high-energy battery system for practical applications. Nevertheless, this potential has been hindered by challenges in terms of the pulverization of Si particles, unstable electrode/electrolyte interface, and severe dissolution of transition metals at high voltage.

Suzhou Chunxing Precision Mechanical Co., ltd. was founded in September 2001 and listed on the shenzhen stock exchange (stock code 002547) in February 2011. Headquartered in ...
