Citizen / Miyota is no exception. They clearly identified points of failure in 0231 / 65xx and improvised the design on their newer movements. I presume a lot of you are engineers and can appreciate how Citizen or Miyota has innovated. 65xx is better than 0231. 8205 is better than 65xx 8205 / 82S0/82S5 with hacking is better than standard 8205

The Miyota caliber 8203 is a 21 jewel automatic movement, first introduced in 1977 (other versions as early

## Citizen 8205 movement energy storage

as 1974). This movement is from the Miyota 8200 family (aka 8 or 82 series) of movements. This 8203 has been discontinued by Miyota/Citizen and is no longer offered in their catalog of movements.

8205 / 82S0/82S5 with hacking is better than standard 8205. 90xx is way better than 82xx. Of course 9 series is expensive as well. Let's review common parts between 0231 which is on the ...

The Miyota caliber 8203 is a 21 jewel automatic movement, first introduced in 1977 (other versions as early as 1974). This movement is from the Miyota 8200 family (aka 8 or 82 series) of movements. This 8203 has been discontinued by ...

The movement has "citizen watch co 8200A unadjusted twenty-one 21 jewels" written. Please I would like to know if its genuine and date of manufacture if possible. Thanks, David. Reply. sweephand says: September 18, 2016 at 00:11. Hi David - the case back info all looks correct, and the model number (4-062019) is an authentic one. So it ...
