Electric motorcycle that can store electricity

Electricity is quite different. Where petrol is an energy store, electricity is energy. It can't be bottled, and to store it you need to convert it into something else - usually chemical energy in batteries when we're talking about electric bikes. You can't see or smell electricity, nor can you weigh it or measure it by size.

In the mid-1970s, Can-Am was known for making motorcycles for endurance races and motocross. But by the mid-1980s, financial turmoil had knocked Can-Am off-course, and the brand's bikes had been ...
