The sample of $x = 0.12$ (0.88BT-0.12BMS) has excellent energy storage density, wide temperature, and wide frequency stability. The excellent energy density of 4.87 J/cm^3 at 315 kV/cm and the energy efficiency of 72% at room temperature for ...

Energy storage density (ESD) values are regularly assessed for AFE and AFE-like, FE, and dielectric (DE) thin films. The reason for the "AFE-like" nomenclature in this work is the current lack of consensus of the physical origins of the hysteresis "double loop" characteristic of AFEs. 6-10 The most prevalent theory behind the AFE behavior is the zero remanent ...
