

Will Croatia build Europe's largest energy storage project?

Croatia is preparing to build Eastern Europe's largest energy storage project. IE Energy has secured EUR19.8 million (\$20.9 million) to develop a 50 MW storage system, potentially extendable to 110 MW by 2024.

Did Croatia get the green light for IE-energy's massive energy storage project?

Croatia got the green light from Brussels for a EUR 19.8 million grant to IE-Energy for a massive energy storage project.

Is Croatia ready for solar energy storage?

"There is immense scope for energy storage in Croatia, predominantly for battery storage." GlobalData says that Croatia is now on target to meet its 36.4% renewable energy target by 2030. However, its recent investment in energy storage has not been accompanied by rapid solar PV development.

Will ie-energy be the biggest energy storage project in southeastern Europe?

Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery system of 50 MW, which means it would be the biggest in Southeastern Europe.

How will a new energy policy affect Croatia?

Furthermore, the measure contributes to the modernisation of Croatia's energy network, as well as to increasing the country's and the EU's energy security of supply. In addition, it will accelerate the decarbonisation of the Croatian energy sector.

Will ie-energy accelerate the decarbonization of Croatia's energy sector?

In addition, it will accelerate the decarbonization of the Croatian energy sector, according to the announcement. IE-Energy is based in Rijeka, Croatia's fourth-largest city. It joined the intraday and day-ahead markets at the Croatian Power Exchange (CROPEX) last year. Documents reveal the project is scheduled to start on December 1.

Local company Vidukin Gaj is planning to build the Luzine and Rupine plants of up to 26MW each at Jasenice in southern Croatia. ... Energy Cooperation.
