Install the Site CTs upstream of all loads and generation: Plug the CT measuring L1 (Phase A) into the CT1 or CT4 port on the meter. Plug the CT measuring L2 (Phase B) into the CT2 or CT3 port on the meter.

When you wire a single phase meter, connect the incoming wires to the meter first. Then hook up the outgoing wires to your breaker box. This makes sure your home gets exactly 240 volts from a single-phase supply. A clear wiring diagram for a single phase meter helps a lot. It shows you exactly what to do and avoids mix-ups.
