

Energy storage jia zhitao

Energy Storage Materials is an international multidisciplinary journal for communicating scientific and technological advances in the field of materials and their devices for advanced energy storage and relevant energy conversion (such as in metal-O2 battery). It publishes comprehensive research articles including full papers and short communications, as well as topical feature ...

Mater., Energy Storage Mater., ACS Catal., SmallSCI80,6? ... Zhitao Wang, Youqi Zhu\*, Chen Qiao, Shuo Yang, Jian Jia, Souleymen Rafai, Xilan Ma, Shide Wu, Fengqiu Ji, Chuanbao Cao\*, Anionic Se-Substitution Toward High-Performance CuS1-xSex Nanosheet Cathode for ...

Dramatic cost declines in solar and wind technologies, and now energy storage, open the door to a reconceptualization of the roles of research and deployment of electricity ...

The electrochemical performances of Zn-based sulfide are significantly improved via the indium incorporation, and a full cell based on the ZnIn2S4 anode with the superior electrochemical performance is developed. Zinc sulfide (ZnS) exhibits promise in sodium-ion batteries (SIBs) because of its low operation voltage and high theoretical specific capacity. ...

Electronic devices have evolved from being rigid to flexible. Over the past decade, flexible body-conformable electronic devices have found applications in energy harvesting and storage 1,2 ...

Rechargeable magnesium batteries (rMBs) are promising as the most ideal further energy storage systems but lack competent cathode materials due to sluggish redox reaction kinetics. Herein, developed is an anionic Se-substitution strategy to improve the rate capability and the cycling stability of 2D ...

Fei Xu, Jing Xu, Hongji Xu, Yuheng Lu, Hongyu Yang, Zhiwei Tang, Zhitao Lu, Ruowen Fu, Dingcai Wu\*, Fabrication of novel powdery carbon aerogels with high surface areas for superior energy storage, Energy Storage Materials, 2017, 7, 8-16. ... Dingcai Wu\*, Facile synthesis of ultrahigh-surface-area hollow carbon nanospheres for enhanced ...

Indium oxide supported nickel catalyst has been experimentally confirmed to be highly active for CO2 hydrogenation towards methanol. In this work, the reaction mechanism for CO2 hydrogenation to methanol has been investigated on a model Ni/In2O3 catalyst, i.e., Ni4/In2O3, via the density functional theory (DFT) study. Three possible reaction pathways, i.e., the ...

As specific requirements for energy storage vary widely across many grid and non-grid applications, research and development efforts must enable diverse range of storage ...

## Energy storage jia zhitao

Energy-storage dielectrics are key enabling materials for high-density power converters, among which lead-free relaxor ferroelectric ceramics have received particular attention. ...

With the development of advanced electronic devices and electric power systems, polymer-based dielectric film capacitors with high energy storage capability have become particularly important. Compared with polymer nanocomposites with widespread attention, all-organic polymers are fundamental and have been proven to be more effective ...

In 2012, our group predicted In 2 O 3, via density functional theory (DFT) study, is a good catalyst for activation of carbon dioxide [15] 2013, we further predicted that In 2 O 3 with oxygen vacancy is a highly selective catalyst for CO 2 hydrogenation to methanol [16]. The theoretical prediction was then experimentally confirmed [17], [18], [19], [20].

To date, Zhitao has published over 60 papers in top international journals, with a total citation of >7,000 times, and h-index of 37. In particular, Zhitao has published 25 first (include co-first) and corresponding authored papers, including 1 in Nature, 2 in Science, 1 in Nat. Photon., 1 in Nat. Rev. Mater., 2 in Nat. Commun., 1 in Natl. Sci. Rev., 2 in Angew.

Relying solely on electrical energy storage for energy regulation makes it difficult to provide a stable and efficient energy supply for microgrid systems currently. Additionally, the economic cost ... Bin Li Qincheng Li Jia Li Zhitao Liu Hongye Su. ...

The Journal of Energy Storage focusses on all aspects of energy storage, in particular systems integration, electric grid integration, modelling and analysis, novel energy storage technologies, sizing and management strategies, business models for operation of storage systems and energy storage ... View full aims & scope \$

Conventional polymeric phase change materials (PCMs) exhibit good shape stability, large energy storage

## Energy storage jia zhitao

density, and satisfactory chemical stability, but they cannot be recycled and self-healed due to their permanent cross-linking structure. Additionally, the high flammability of organic PCMs seriously restricts their applications for thermal energy storage ...

Energy storage provides a cost-efficient solution to boost total energy efficiency by modulating the timing and location of electric energy generation and consumption. The ...

energy storage.5-7 Many catalysts have been exploited and re-ported for CO 2 hydrogenation.8-22 Among all the catalysts exploited, supported nickel catalysts are promising because of their high activity and relatively low price.8-15 In addition, sup-ported nickel catalysts have been employed in the industrial Zhitao Zhang is currently a PhD

Polyanion-type fluorophosphate Na 3 V 2 (PO 4) 2 O 2 F (NVPOF) is broadly regarded as a fascinating cathode candidate for high energy density and sustainable sodium-ion batteries (SIBs) due to its high operating potential, high capacity and robust sodium super-ionic conductor (NASICON) framework. However, the inferior rate property and service life caused ...
