

What is ETAP harmonic analysis?

Complied Harmonic Standards: Learn how engineers use ETAP Harmonic Analysis software to simulate harmonic current and voltage sources, identify harmonic problems, reduce nuisance trips, design, and test filters, and report harmonic voltage and current distortion limit violations on balanced or unbalanced systems.

How to adjust the harmonic source information in ETAP?

First of all, you need to adjust the Harmonic sources information in your system (VFDs, UPS, static loads .. etc), just by double click on the component symbol in the SLD and open the Harmonic page, ETAP provides two options, IEEE 510 equation or use library data where you can choose load type, model and manufacturer.

What is a harmonic analysis module?

With the Harmonic Analysis module, you can simulate harmonic current and voltage sources, identify harmonic problems, reduce nuisance trips, design and test filters, and report harmonic voltage and current distortion limit violations.

Can a power converter harmonic model be used for harmonic analysis?

Y. Sun, V. Cuk, E. C. de Jong and J. F. G. Cobben in their study "Ultrafast charging station harmonic resonance analysis in Dutch MV grid: application of power converter harmonic model" created a viable model for conducting harmonics analysis.

How to adjust THD & IHD in ETAP?

By default, ETAP sets all the buses to allow 2.5% THD (Total Harmonic Distortion) and 1.5% IHD (Individual Harmonic Distortion) in accordance with the IEEE 519 standards. You could adjust it according to your requirements just double click on the bus-bar in your SLD. you'll see the popup window similar to the following:

How to model a harmonic-generation device?

Modelling of harmonic-generation devices consists of a current source model as shown in Fig. 2. It can be seen in this figure that the Harmonic current source, which is the inverter in case of a Solar PV System, supplies harmonics to the grid, which needs to be filtered out. In Fig. 2, an illustration of harmonic current flow has been shown.
