

Europe's no 1 brand of energy storage appliances

Is Europe a leader in residential energy storage?

While China and the US dominate the market, Europe leads in residential energy storage- and this is set to expand on the continent by nearly tenfold this decade. However, by 2023 Europe will give up its leadership position to the Americas, where there will be further investment in the residential segment.

Are European energy storage systems on the rise?

Europe's utility-scale energy storage systems (ESS) are on the rise, boasting a robust revenue model. The European large storage market is starting to shape up. According to data from the European Energy Storage Association (EASE), new energy storage installations in Europe reached approximately 4.5GW in 2022.

Which country has the most residential storage systems in Europe?

Lagging behind Germany by a considerable margin, the other four countries making up the top 5 of the European residential storage system market are Italy, Great Britain, Austria and Switzerland. Together, these five countries are home to 93% of all European residential storage systems.

Why is battery energy storage important in Europe?

The increasing deployment of C&I and large-scale Battery Energy Storage Systems across Europe marks a significant step towards a sustainable and resilient energy future. As the continent continues to lead in renewable energy adoption, BESS plays a pivotal role in balancing grid operations, enhancing energy efficiency, and driving carbon reduction.

Who dominates the residential storage market in Europe in 2023?

The residential storage market in Europe is dominated by a small cluster of leading brands. The CR3 (Concentration Ratio) in 2023 reached more than 50%. With 29% overall market share in 2023, BYD has been dominating the market segment, followed by the second and third positioned brands with 13% and 9% market share.

Which country has the most electrical storage systems in 2023?

The Electrical Storage Report by EUPD [i] showed significant growth for residential storage systems in 2023 across Europe. Germany was leading the market with +530,000 residential systems installed, followed by Italy with 268,282 and the UK with 103,912. By the end of 2023 Germany and Italy had a combined installed capacity of +7.7GWh.

In the first half of 2023 alone, an additional 6.3GWh of installations were made, equivalent to eight months' worth of installations in Europe's residential energy storage systems (ESS) markets. The inventory has now stabilized at a normal level. In 2023, the residential ESS market in Europe reached approximately 9.5GWh.
