

What is the growth rate of oil storage market?

Oil storage market from the floating roof product segment is slated to exhibit around 4% growth rate through 2030. The growing requirement for robust storage solutions for medium and low flash point petroleum is a prominent factor driving product demand.

What will global oil consumption be in 2026?

As a result, by 2026, global oil consumption is projected to reach 104.1 mb/d. This would represent an increase of 4.4 mb/d from 2019 levels. Oil demand in 2025 is set to be 2.5 mb/d lower than was forecast a year ago in our Oil 2020 report.

How many barrels of crude oil are there in the world?

There is a total of 3.4 billion barrels of crude oil storage that was in use worldwide as of March 2020. Only 0.5 billion barrels of crude oil storage was available across the U.S. as of the same time, the majority of which was available in tanks. Get notified via email when this statistic is updated.

Will global oil production increase by 5 Mb/d by 2026?

Those sharp spending cuts and project delays are already constraining supply growth across the globe, with world oil production capacity now set to increase by 5 mb/d by 2026. In the absence of stronger policy action, global oil production would need to rise 10.2 mb/d by 2026 to meet the expected rebound in demand.

How many barrels of oil a day will the world produce?

Global oil production is projected to reach around 120 million barrels per day by 2050 in the Reference case. Refineries adjust production over time to meet a changing product slate in which gasoline demand falls and jet fuel demand rises with global economic growth. Natural Gas

What is the biggest oil surplus ever?

The largest ever oil surplus is set to hit markets in April 2020, with serious concerns about how to store excess oil. Roughly 7.2 billion barrels of crude oil and crude oil products are currently stored onshore and on floating vessels, meaning that only 1.7 billion barrels of onshore storage were available in March 2020.

“Storage prices for gasoil doubled in the last three weeks from 2 euros (\$2.16) per cubic metre per month to 4 euros,” said Patrick Kulsén from Insights Global, a firm that tracks oil product ...
