Can gravity storage keep costs down?

Photograph: Peter Dibdin Edinburgh-based energy storage startup Gravitricity has found a novel way to keep the costs of gravity storage down: dropping its weights down disused mineshafts, rather than building towers.

Is gravity a solution to energy storage?

But without an easy way to store large amounts of energy and then release it when we need it, we may never undo our reliance on dirty, polluting, fossil-fuel-fired power stations. This is where gravity energy storage comes in. Proponents of the technology argue that gravity provides a neat solution to the storage problem.
