The upcoming plant will not be constructed from scratch.

As integral efforts of the hydrogen energy strategy, Great Wall Motors will build an international supply chain ecology integrating hydrogen "production -storage-transportation-refueling-application", break barriers on core technologies and connect the downstream industry chain, accelerating the commercial popularization of hydrogen energy.

National Energy Group, NICE focuses on clean-coal applications, chemical catalysis, new materials, CO<sub>2</sub> capture and utilization, energy storage, renewables, clean hydrogen, and environmental technologies. Its goal

is to reduce pollution and provide cleaner, more efficient energy. The development of clean-coal technologies is one of the

J: Maximum Capacitance Energy Storage. e.g.: DTR-15000. The model of Capacitance energy storage type spot and projection welder, which maximum energy storage is 15000J, is DTR-15000. Features: 1. DTR series capacitive energy storage adopted the welding manner of capacitive energy. The output current is more accurate. The impact on the power ...
