

Do deterministic and uncertain policies affect energy storage technology investment?

To compare deterministic and uncertain policies' incentive effect on energy storage technology investment, this study selects the average peak and off-peak power price difference for energy storage participation in peak regulation auxiliary services in some Chinese provinces as a reference standard in this study.

Can a firm invest in two energy storage technologies sequentially?

Under the continuous investment strategy, the firm can invest in two energy storage technologies sequentially, and each state is subject to policy uncertainty. Fig. 4 indicates the different states of the continuous investment strategy and the corresponding value functions under policy uncertainty.

Is there a real option model for energy storage sequential investment decision?

Propose a real options model for energy storage sequential investment decision. Policy adjustment frequency and subsidy adjustment magnitude are considered. Technological innovation level can offset adverse effects of policy uncertainty. Current investment in energy storage technology without high economics in China.

How can we evaluate investment decisions for energy storage projects?

For instance, Li and Cao proposed a compound options model to evaluate the investment decisions for energy storage projects under the uncertainties of electricity price and CO₂ price. Kelly and Leahy developed a methodology for applying real options to energy storage projects where investment sizing decisions was considered.

How to choose the best energy storage investment scheme?

By solving for the investment threshold and investment opportunity value under various uncertainties and different strategies, the optimal investment scheme can be obtained. Finally, to verify the validity of the model, it is applied to investment decisions for energy storage participation in China's peaking auxiliary service market.

What is the investment threshold for energy storage technology?

First, the investment threshold for the first energy storage technology under the single strategy is 0.0757 USD/kWh, which is higher than the technology investment threshold of 0.0656 USD/kWh for the first energy storage under the continuous strategy.

Recently, Houpu Engineering (Hongda) (HQHP's wholly-owned subsidiary), successfully won the bid of the EPC total package project of Hanlan Renewable Energy (Biogas) Hydrogen ...
