What is a battery energy storage system (BESS)?

Battery Energy Storage Systems (BESS) are pivotal technologies for sustainable and efficient energy solutions.

What is a battery energy storage system?

BESSs are modular, housed within standard shipping containers, allowing for versatile deployment. When planning the implementation of a Battery Energy Storage System, policy makers face a range of design challenges. This is primarily due to the unique nature of each BESS, which doesn't neatly fit into any established power supply service category.

Are batteries a viable energy storage technology?

Batteries have already proven to be a commercially viable energy storage technology. BESSs are modular systems that can be deployed in standard shipping containers. Until recently, high costs and low round trip efficiencies prevented the mass deployment of battery energy storage systems.

Can a battery energy storage system be used as a reserve?

The BESS project is strategically positioned to act as a reserve, effectively removing the obstacle impeding the augmentation of variable renewable energy capacity. Adapted from this study, this explainer recommends a practical design approach for developing a grid-connected battery energy storage system. Size the BESS correctly.

Why do we need battery energy storage systems?

Combined with rapid decreases in the costs of battery technology and improving incentives for storage projects (notably the IRA), increasing needs for system flexibility highlight the increasing role of battery energy storage systems, or "BESS" projects, in accomplishing global, national and local clean energy and climate goals.

Why should a battery energy storage system be co-located?

In doing so, BESS co-location can maximise land use and improve efficiency, share infrastructure expenditure, balance generation intermittency, lower costs, and maximise the national grid and capacity. The battery energy storage system can regulate the frequency in the network by ensuring it is within an appropriate range.
