What are base year costs for utility-scale battery energy storage systems?

Base year costs for utility-scale battery energy storage systems (BESSs) are based on a bottom-up cost model using the data and methodology for utility-scale BESS in (Ramasamy et al., 2023). The bottom-up BESS model accounts for major components, including the LIB pack, the inverter, and the balance of system (BOS) needed for the installation.

How much does battery storage cost?

The costs of installing and operating large-scale battery storage systems in the United States have declined in recent years. Average battery energy storage capital costs in 2019 were \$589 per kilowatt-hour (kWh), and battery storage costs fell by 72% between 2015 and 2019, a 27% per year rate of decline.

How much energy does a battery storage system use?

The average for the long-duration battery storage systems was 21.2 MWh, between three and five times more than the average energy capacity of short- and medium-duration battery storage systems. What is the average power capacity of a battery storage system?

For costs reported between 2013 and 2019, short-duration battery storage systems had an average power capacity of 12.4 MW, medium-duration systems had 6.4 MW, and long-duration battery storage systems had 4.7 MW. The average energy capacity for the short- and medium-duration battery storage systems were 4.7 MWh and 6.6 MWh, respectively.

Do battery storage technologies use financial assumptions?

The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions. Therefore, all parameters are the same for the research and development (R&D) and Markets & Policies Financials cases.

When will large-scale battery energy storage systems come online?

Most large-scale battery energy storage systems we expect to come online in the United States over the next three years are to be built at power plants that also produce electricity from solar photovoltaics, a change in trend from recent years.
