Industrial parks play a pivotal role in China's energy consumption and carbon dioxide (CO₂) emissions landscape. Mitigating CO₂ emissions stemming from electricity consumption within these parks is instrumental in advancing carbon peak and carbon neutrality objectives. The installations of Photovoltaic (PV) systems and Battery Energy Storage ...

Distributed photovoltaics (PVs) installed in industrial parks are important measures for reducing carbon emissions. However, the consumption level of PV power generation in different industries varies significantly, and it is often difficult to consume 100% of the PV power generation. The shared energy storage station (SESS) can improve the consumption level of ...
