

Place your trust in the best in injection molding technology. Our modular product range includes hydraulic, hybrid, and electric injection molding technology - from consistently standardized entry-level models to customized machines. From performance versions to high-speed machines. Our ALLROUNDERS make everything possible. Injection molding ...

Victor Taichung VsP Series injection moulding machine has been developed by fusing of merits of hydraulic injection machines (low maintenance-free operation, long life, and low cost) and electric molding machines (energy-saving, high-velocity injection, quick response, high repeatability, and low operation noise)

Roboshot is designed to reduce energy consumption by 50 to 80% while maintaining repeatable and precise cycles that are 5 to 50% faster than hydraulic machines. Engineered for greater ...

The machine control IMC 400 is presenting all data well-structured and intuitively comprehensible on a 15" TFT touchscreen. The applications include alarm functions and moulds for quality and production management. A USB interface can save mould data for up to 1,000 moulds and parameters from the control offline. The control IMC 400 has control options for automation, ...

The Roboshot's pre-injection functionality enables the time between the beginning of injection molding and clamping force build-up to be determined freely. Enhanced mold venting is controlled by injection timing. By using the pre-injection function, your cycle times may be ...

Large-scale components for automotive, storage, and industrial applications often necessitate the robust power and expansive capacity that hydraulic machines are renowned for, ... The superiority of all-electric injection molding machines in energy efficiency is notable, with these machines typically offering 20%-40% electricity savings ...

On the far side of an Injection molding machine, there is the clamping system. The clamping system has a dual purpose: it keeps the two parts of the mold tightly shut during injection and it pushes the part out of the mold after it opens. After the part is ejected, it falls on a conveyor belt or a bucket for stor-

Mold breathing provides useful information about the processes that occur in the mold and the cavity. Mold-maker Schneider Form and injection molding machine-maker ENGEL have recognized the potential which this process variable offers and have worked intensively on it for several years, albeit by adopting different approaches.

The injection moulding machine use the high-performance servo dynamic control system, the oil pump as

power source, having the characteristics as follow: high response, saving energy, low noise, high-control precision, and have the breakthrough in the perfect connection of the electrical servo and hydraulic drive system.; Plastic Injection Molding Machine is "the new breakthrough" ...

injection molding machine. Different injection molding machines consume vastly different amounts of energy, based on the size of their clamping mechanisms, screw, heater, and pumps. Production requirements also have an indirect contribution to the energy consumption. For example, production in smaller batches requires that the machine be

31 - "Oil Level too Low" - Indicates the hydraulic oil level is too low eck the hydraulic oil level and fill up if necessary. 32 - "Oil Filter Blocked" - Indicates a blocked hydraulic oil filter eck the filter and clean if necessary. 33 - "Ptm.Board Check Error" - Indicates a communication problem with the potentiometer board.

The em series is a high-end machine positioned at the pinnacle of 2-platen injection molding machines, boasting the industry's top-class performance. This series is designed to meet a variety of customer needs, such as carbon neutral and high value-added molding, while achieving further &quot;space saving,&quot; &quot;energy saving,&quot; and &quot;high speed&quot;.

Energy-saving servo injection molding machines 600 - 33,000 kN HAITIAN MARS III SERIES HAITIAN PLASTICS MACHINERY GROUP CO., LTD No. 1688 Haitian Road, Xiaogang, Beilun, Ningbo, P. R. China. + 86-574-8617 7005 (China) + 86-574-8617 7242 (International) haitian@mail.haitian NINGBO HAITIAN HUAYUAN MACHINERY ...

The e-cap is our energy-efficient caps and closures toggle clamp injection molding machine. You save money thanks to water-cooled servo-electric drives and a water-cooled kinetic energy storage system. Combined with the well-known high dynamics and precision of the ENGEL injection molding machine, you produce high-quality and cost-effective parts.

8 An energy saving guide for plastic injection molding machines Plastic injection molding machines The right drive technology Plastic injection molding machine drive technology has changed dramatically over the past couple of decades. In energy terms, the most signi&#222;cant change is the arrival of all-electric and hybrid machines. However, even

PMS Plastics and GEK Plastic Injection Moulding Machine Suppliers, China have been in collaboration for a number of years. We have supplied and installed a number of this Range of machinery around South Africa and our customers are very satisfied. The GEK range of Machinery is an economical machine with no sacrifice on the quality and workmanship.

Energy use in injection molding is variable, controllable and directly related to production. The key to understanding your energy consumption is the Performance Characteristic Line (PCL), ...

2 3 Machine series 450 to 3500(ton) 50 to 150(ton) 30 to 450(ton) 220 to 350(ton) / 250(ton) 50 to 450(ton) 90 to 880(ton) TB | Hydraulic TE | All electric TN | Hydraulic & All electric VH | Vertical hydraulic DL | Two platen hydraulic TH | Hydraulic 500 ton 1000 ton 1500 ton 2000 ton 2500 ton 3000 ton 3500 ton

All-Electric SXIII Series Machine. With the EC30SXII All-Electric Injection Molding Machine, molders get an all-electric injection molding machine that delivers fast injection speeds and dry cycle times, ensures longer mold life and provides more uniform clamping force, for greater productivity, flexibility, and versatility, job after job.

The Energy Spy unit displays, records and alerts you to plant-wide energy use. It has user-settable alarm levels for Power Factor and Kw Demand. When these alarm levels are reached, ...

PLCs (Controllers) for Plastic Injection Molding Machines INJkon 10.2"; Rich Color Graphical TFT Options Available For Vertical Graphics Options Available For Double Color Injection Molding M/Cs USB data storage facility 200 nos of Alpha Numaric ...

mum 200 injection molding machines at the same time to facilitate the data transmission and management. Such injection related data will be converted into excel files for easier data management and retrieval. Setting log Users can store the changes they made hourly and print out the log of setting changes. Storing & Printing

Machine is compact, from the raw material to the finished product, no need to purchase injection molding machine, it can reduce equipment investment cost greatly and save workshop space (machine and bottle preform storage space). energy conservation. No need secondary heating preform, along with energy saving system, can save about 30% power. clean

enable the machine to be more stable for injection molding. Fast Synchronized lock nut mechanism, precision movable platen supports, quick hydraulic cylinders, differential fast mold opening, low-resistance hydraulic circuit design and high-response servo system enable the machine to operate more efficiently and response faster.

ENERGY SAVING INJECTION MOULDING MACHINES ADVANTAGES OF SERVOTECH TECHNOLOGY In an addition to standard injection moulding machines with clamping force ranging between 700 and 30.000 kN, we can provide vari-able pump and servo pump drive injection moulding machines which are optimized with servo energy-saving technology. These ...

Screw control is highly responsive thanks to a structurally original injection system and low inertia servo motor. Moreover, plasticization, filling and pressure holding are precisely and stably ...

CPT offers Energy Management Devices to help optimize injection mold machine power consumption during

startup, shutdown, and idle periods. ... 513-619-7415. Open Menu. Products. Injection Molding Machines. Two-Color Machines; Two-Platen Injection Molding Machines; All Electric Injection Molding Machines ... records and alerts you to plant-wide ...

The mold size, and not the maximum clamping force, is often the key to the optimum machine. The tie-bar-less design of the e-motion TL injection molding machine enables you to achieve targeted and efficient production with a minimal footprint, even with a high number of cavities.

Networking solutions for molding machines and MES M2M solutions for molding machines and peripherals Multiple molding machines are monitored simultaneously. If trouble occurs, an alert is instantly issued, giving users a head-start

Mold breathing is the basis for iQ clamp control. If this is too high or too low, parts will show injection molding defects like burns or burrs. Mold wear is also a consequence. The intelligent iQ clamp control software calculates the optimum clamping force. Resource-saving production reduces the load on the machine and saves energy.

saves energy. SERIES 8 . Super-Large Mult-Component Injection Molding Machine ITS VERY WELL ... Its non-volatile storage can hold 250 sets of molding data, 500 alarm records, plus 100 modification records and features ... injection molding machine to form an independent double barrel with special design nozzle, during the injection

injection molding machine - 1000 t Kaptiva high tonnage machine range is from 275T to 450T. In medium tonnage range we have option of Servo Machine & Machine With Variable Frequency Drive (AC Drive) and Fix Pump.
