During 2024 and 2025, falling equipment prices and supportive policies will accelerate the development of U.S. energy storage market. However, C& I energy storage sees limited growth and requires more time to yield progress, given its premature market mechanism and suppliers failing to introduce effective profit models to manufacturers.

The Italian renewables energy associations, ANIE Rinnovabili, Elettrocità Futura and Italia Solare agree that Italy must install at least 85 GW of new renewables capacity by 2030 to achieve their REPowerEU targets. They also believe that Italy must install 80 GWh of new large-scale storage capacity to effectively integrate new power into the grid.

The auction, which was for delivery of projects to begin operation in 2024, has been credited with kickstarting the Italian market for grid-scale energy storage s biggest winner was utility Enel, which won more than 90% of contracts up for grabs.
