

# Italy supports energy storage

Does Italy need electricity storage?

As Italy's energy mix is increasingly composed of variable renewable energy sources, electricity storage will be needed to integrate power generated by renewables into the national grid and make it available when sun and wind energy are not accessible.

Does Italy need 9gw/71gwh of energy storage?

Italy's TSO Terna says it needs 9GW/71GWh of energy storage by integrate its renewables pipeline. Image: Terna. The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy.

Is Italy a good market for large-scale energy storage?

Alongside the MACSE auction, they touched on grid, project development and opportunities for software and optimisation providers. Mahael Fedele, Partner, CEO of Sphera Energy, said that Italy has several unique characteristics that make it an exciting market for large-scale storage. "The country obviously needs energy storage.

Are battery energy storage systems needed in Italy?

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having a capacity of less than 20 kWh.

How will Italy invest in electricity storage?

Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. The new storage capacity will be acquired through tenders published by Terna, the manager of Italy's high voltage grid. The next tender will be released in 2024.

What is the res scheme in Italy?

The Italian scheme The scheme notified by Italy will support the construction of electricity storage facilities with a joint capacity of more than 9 GW/71 GWh. The scheme will run until 31 December 2033. The measure aims to facilitate the integration of renewable energy sources ('RES') in the Italian electricity system.

Energy Storage Journal (business and market strategies for energy storage and smart grid technologies) is a quarterly B2B publication that covers global news, trends and developments in energy storage and smart grid markets.

Italy's National Energy and Climate Plan (NECP) includes specific targets for storage technologies Italy's storage targets Italy's target for the share of renewable electricity by 2030 55% Utility-scale 3-4 GW Customer-sited 4.5 GW Italy's NECP targets between 7.5 GW and 8.5 GW of energy storage by 2030, of

which 4.5 GW is expected

Italy Energy and Natural Resources. Authors. 1. INTRODUCTION. ... Particularly electrochemical storage has the potential to support the Italian national electricity generation system, but at the moment technological difficulties for replacing fossil fuels are still present and are connected to those characteristics (low accumulation ...

Support your strategic planning with expert insight on the wider trends impacting markets, from the circular economy and the energy transition to global macroeconomics and chemical overcapacity in China. Read more Events & Training ... ENERGY STORAGE IN ITALY Figures by industry group Italia Solare put the current size of the Italian energy ...

The measure is envisaged to contribute to the goals from the European Green Deal and Fit-for-55 package by enabling the integration of renewable energy sources. After winning clearance in Brussels, Italy can now select companies developing electricity storage projects eligible for subsidies.

Overall, the fundamentals of the Italian energy storage market are robust enough to support the projection of Italy becoming Europe's third-largest energy storage market by 2030 when the share of renewables in the country's energy mix reaches 65% (Energy Storage News, 2023).

Located in Avetrana in the Province of Taranto, Italy, Torre di Pierri is a 9.3 MWh standalone system that supports grid stability and arbitrage. Trina Storage was contracted by Trinasolar ISBU for the provision of the battery energy storage system, representing the first time the former has delivered a utility-scale energy storage project in ...

The grid-scale energy storage market in Italy is set to become one of the most active in Europe in the next few years having been close to non-existent until now. Research firm LCP Delta recently forecast that after annual grid-scale deployments of just 20MW in the last few years, Italy would deploy 800-900MW in 2023/2024, second in scale only ...

The owner of the project is Trinasolar's International System Business Unit (ISBU), its global project development. The standalone BESS will support grid stability and also do wholesale energy trading. The project has a contract with Italian transmission system operator (TSO) Terna to provide the Fast Reserve ancillary service for 1,000 annual operation hours, ...

POWER: What factors will support energy storage installations in Europe? Reader: ... We understand that Italy, Germany and Spain are leaders in this space, which is a technology requiring the ...

In 2023, residential energy storage continued to dominate Italy's energy storage landscape, representing the largest application scenario for newly added installations. Residential PV systems retained their prominence, accounting for 82% and 73% of new installations, followed by utility-scale storage and commercial &

industrial (C& I) energy ...

The Italy Battery Energy Storage Systems Market achieved a valuation of USD 212.50 million in 2022 and is poised for robust growth in the projected period, ... Some regions within Italy might extend specific incentives, grants, or support for energy storage projects, aligned with local energy transition objectives. ...

The need for grid modernization, energy storage, and policy support are critical to ensuring that Italy can continue to grow its renewable energy capacity. Curtailment --the reduction of renewable energy output due to grid limitations--remains a challenge, particularly in regions with older grid infrastructure.

The development of Battery Energy Storage Systems (hereinafter "BESS") in Italy has been limited by the fact that the spread of renewable sources is not such as to produce significant price ...

The scheme notified by Italy will support the construction of electricity storage facilities with a joint capacity of more than 9 GW/71 GWh. The scheme will run until 31 December 2033. The ...

The results of the survey show that 89% of the surveyed installers in Italy offer energy storage to their customers, compared to 64% from last year's survey. A further 10% are planning to include storage solutions in their portfolio by the end of 2022. This development indicates a growing market for storage systems.

Italy's proposed scheme involves supporting the development of electricity storage facilities, collectively possessing a capacity exceeding 9 GW/71 GWh. This initiative is ...

RECs: Energy storage solution are crucial, MGTES takes the spotlight. ... Italy supports the Renewable Energy Communities. In Italy, support for RECs is already wide and authoritative. There is a lot of media coverage about it, RECs are at the center of national and international political agenda, and initiatives are popping up to foster the ...

The new market rules will allow grid operator Terna to run large-scale energy storage auctions. Terna will now run a consultation with the industry on the proposed new auction system and the first auctions should take place in late 2023/early 2024, two developers interviewed for a special feature in PV Tech Power (Vol.35) (Premium access) recently told ...

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating ...

The scheme notified by Italy will support the construction of electricity storage facilities with a joint capacity of more than 9 GW/71 GWh. The scheme will run until 31 December 2033. ... The Commission adopted in March 2023 a list of recommendations to ensure greater deployment of energy storage, accompanied by a Staff Working Document ...

## Italy supports energy storage

Continues the energy storage development in Italy with NHOA Energy The 50MWh system will support ERG's wind farm in Vicari, Sicily Paris, 18 July 2024 - NHOA Energy, the company of NHOA Group (NHOA.PA) dedicated to energy storage, is working on the construction of an approximately 50MWh battery storage project in Sicily,

NHOA Energy, the company of NHOA Group (NHOA.PA) dedicated to energy storage, is working on the construction of an approximately 50MWh battery storage project in Sicily, southern Italy, awarded by ...

Minister of the environment and energy security Gilberto Pichetto has signed a decree allowing Italy to proceed with its energy storage capacity auction, known as MACSE, in the first half of 2025. ... and Terna is aiming for it to support the deployment of 50GWh of energy storage by 2030, ...

In this process, electricity storage developers will vie for support by submitting offers based on the lowest requested aid per offered capacity volume. This initiative is open to all technologies that meet the performance criteria established by the Italian Transmission System Operator (TSO) and endorsed by the Italian Energy Regulator.

The energy storage market in Italy doubled in capacity in the first half of the year, though Q2 saw the first slowdown in nine quarters and that could be repeated in H2, according to the country's renewable energy trade body. As of 30 June, 2023, a total of 3,045MW and 4,893MWh of energy storage is installed in Italy according to ANIE ...

Minister of the Environment and Energy Security Gilberto Pichetto has signed a decree allowing Italy to proceed with its energy storage capacity market auction, known as MACSE, in the first half of 2025. ... Taiwan Cement Corporation's buyout of NHOA is a "reconfirmation of strategic financial support" from the majority shareholder ...

Why is gas power critical to support Italy's energy future? ... and can provide long-term, low-cost energy storage. Gas-fired power plants are available regardless of the time of day or weather conditions, providing dependable capacity as long as needed, whether for minutes, hours, days or weeks at a time. With Italy's plans to add a ...

The Economic Feasibility of Residential Energy Storage Combined with PV Panels: The Role of Subsidies in Italy . &#215; ... The "fiscal deduction" scenario defines also the opportunity to support the PV energy expansion policy in the residential sector through two measures: (i) 50% fiscal deduction, as an alternative to 36%; and, (ii) a time of ...

The 50MWh system will support ERG's wind farm in Vicari, Sicily . Paris, 18 July 2024 - NHOA Energy, the company of NHOA Group (NHOA.PA) dedicated to energy storage, is working on the construction of an approximately 50MWh battery storage project in Sicily, southern Italy, awarded by ERG, alongside an

associated 5-year operation and maintenance contract.

It is not a bold statement to say that 2024 will be the year of Renewable Energy Communities in Italy. The introduction of Renewable Energy Communities into the Italian regulatory process dates back to "Milleproroghe" Decree 162/2019, (converted by Law No. 8/2020 of Feb. 28, 2020), which transposes the European RED II Directive (2018/2001/EU)..The ...

This EUR5.7 billion scheme enables Italy to support the production and self-consumption of renewable electricity by energy communities. It will strengthen citizens' engagement and first ...

The systems, totalling 40 MW, are part of the first Fast Reserve auction in Italy and build on the Fluence team's experience in Italy, delivering a 1.4 MW/0.7 MWh battery energy storage system for Terna's "Storage Lab" in Codrongianos, Sardinia, and a 12 MW/72 MWh system for Terna's "Large Scale" project in Ginestra.

The standalone BESS will support grid stability and also do wholesale energy trading. The project has a contract with Italian transmission system operator (TSO) Terna to provide the Fast Reserve ancillary service for 1,000 annual operation hours, following a tender run by the TSO. ... (CM) auctions have concluded in Italy and Belgium and ...

Rome - July 4, 2023 - Matrix Renewables ("Matrix"), the TPG Rise-backed global renewable energy platform, today announced that it has started a partnership with Gravel A through a proprietary Development Service Agreement (DSA) for the development of up to 1.5 GW of standalone Battery Energy Storage Systems (BESS) in Italy. The first stage of this partnership ...
