

Can China help Laos increase electricity exports?

“Laos is catching up in exploring hydropower resources, but shortages in transmission lines and distribution systems are still acute, which blunts its capacity to increase electricity exports. Chinese companies have been helping with this,” the insider said. Electricity export has become an important driver of the Lao economy.

Why is electricity important in Laos?

Electricity export has become an important driver of the Lao economy. According to media reports, electricity has contributed to over 10 percent of GDP and 30 percent of its export volume for many years. The main export destinations are Southeast Asian countries such as Thailand, Vietnam, Cambodia and Singapore.

Why is power china important to Laos?

POWERCHINA has undertaken investment and construction for the Nam Ou River Cascade Power Stations, China-Laos Railway and other major projects with international influence, and has cultivated a batch of excellent engineering talents for Laos and made great contributions to the development of the local economy and people's livelihood.

What is energy storage business scope?

The company's business scope covers research and development, manufacturing, testing, service and general engineering contracting of energy storage device. The business includes battery, PCS, BMS, EMS, energy storage power station, small energy storage products, mobile energy storage and other whole industry sectors.

How many Cascade hydropower plants are there in Laos?

It includes seven cascade hydropower plants along the Nam Ou River, which is the largest tributary of the Mekong River in Laos. The construction plan is the most reasonable one, as it eliminates the number of local residents who need to be relocated and the impact on the environment, PowerChina said.

How does China-Laos energy cooperation work?

China-Laos energy cooperation has brought new development opportunities to remote villages in the Southeast Asian nation's mountainous regions, assisting the hydropower-rich nation to leverage its water resource and boost electricity export, business representatives said on Tuesday.
