

Lima energy storage prefabricated cabin supplier

What are the advantages of enerD series liquid-cooled energy storage prefabricated cabins?

Compared with the previous generation of products, the new EnerD series liquid-cooled energy storage prefabricated cabins save more than 20% of the floor area, reduce the construction work by 15%, and commission and operate Dimension costs have dropped by 10%, and energy density and performance have also been significantly improved.

Why is CATL a leader in liquid cooled energy storage?

As the world's leading provider of energy storage solutions, CATL took the lead in innovatively developing a 1500V liquid-cooled energy storage system in 2020, and then continued to enrich its experience in liquid-cooled energy storage applications through iterative upgrades of technological innovation.

Why should I prefabricate my cabin?

As well as making installation more straightforward, prefabricating the cabins enables us to ensure the highest possible level of finish, while also delivering better value for you. Your cabin will pass through our quality checks and will be given our final seal of approval before we transport your finished cabin from our workshop to your location.
