

Lishen energy storage

What is Lishen battery's performance in energy storage?

These accomplishments demonstrate Lishen Battery's leading position and continuous innovation capacity in energy storage. Lishen Battery successfully developed 314Ah and 325Ah energy storage cell. 314Ah battery is expected to be in massive production in second quarter of 2024. The development of 325Ah battery A specimen will be over.

Who is Lishen battery?

LISHEN specializes in the electric industrial, construction, off-highway vehicle battery solutions and home, residential ESS, industrial and commercial ESS, grid scale ESS, container ESS, utility ESS etc. LISHEN aims to deliver the most cost-effective lithium battery products to the world.

What is Lishen energy storage cell?

Lishen energy storage cell caters to market and industry pain points. Adopting 280Ah cell size, it achieves significant upgrading of capacity and energy density without changing volumetric size through innovation and new design. In particular, energy density is over 180Wh/kg, a great breakthrough.

What makes Lishen battery unique?

Lishen Battery is always customer centered and market-oriented. It adheres to innovation and development, intensively engages itself in new energy and lithium battery technology and upgrades new energy technology.

How much will Lishen invest in EV battery development?

Lishen will be investing more than RMB 10 billion into this project, which will span an area of 870 mu and have an annual production capacity of 24GWh for EV power batteries. According to the reporting by other news outlets, the project will be developed in three phases, with 8GWh being added for each phase.

How will Lishen increase its production capacity?

In order to further scale up its production, the company has initiated new projects in Wuxi, Chuzhou, etc. Wanting to take full advantage of the current boom in the market for EV power batteries, Lishen aims to raise its annual total production capacity to 120GWh by the end of China's 14th Five-Year Plan (2021-2025).

Combining power production, transmission and distribution, distributed power production and power demand, a one-stop energy storage system solution. Rated Power: 322.560kW.
