The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.

Antonio Almonte, Minister of Energy and Mines, credited sound public policies--including less bureaucracy and more transparency--with spurring "a major leap" in renewable energy in the Dominican Republic. Fourteen of the new projects underway are solar photovoltaic (PV) systems and the others are wind power.
