What is a charging pile?

The charging pile (as shown in Figure 1) is equivalent to a fuel tanker for a fuel car, which can provide power supply for an electric car.

Why do mobile charging piles need a lot of space?

For mobile charging piles, the influence of high land cost is less significant. The reason is that fixed charging needs a parking place for each pile; the charging station must buy or rent a huge space. While a mobile charging pile is delivered to a user, it only needs a compact space for battery storage and charging.
