Which utility-scale energy storage options are available in Oman?

Reviewing the status of three utility-scale energy storage options: pumped hydroelectric energy storage (PHES), compressed air energy storage, and hydrogen storage. Conducting a techno-economic case study on utilising PHES facilities to supply peak demand in Oman.

Does Oman have a power sector?

In 2015, Oman committed to an unconditional 2% emissions cut by 2030 at the United Nations Climate Change Conference. This target is to be achieved through reduction in gas flaring and increase in the utilisation of renewable energy (Carbon Brief 2016 ). The third challenge of the power sector in Oman is supply mix.

How can energy storage improve the penetration of intermittent resources?

Energy storage can increase the penetration of intermittent resources by improving power system flexibility, reducing energy curtailment and minimising system costs. By the end of 2018 the global capacity for pump hydropower storage reached 160 GW whereas the global capacity for battery storage totalled around 3 GW (REN21 2019 ).

What is Oman's new PV policy?

Recently, the government in Oman introduced new policy that encourages the residential sector to install photovoltaic (PV) cells on their rooftops. This is expected to have more energy produced from PV in the future, which will be fed back to the grid.

**Design Description:** Advanced battery technology like Lithium-ion batteries lies at the core of Cabinet Energy Storage systems. Integrated inverters and power electronics are vital components that facilitate the conversion of DC energy stored in batteries into AC for use in electrical grids or various applications.

**Product Overview.** Adopting the design concept of “unity of knowledge and action”, integrating long-life LFP batteries, BMS, high-performance PCS, active safety systems, intelligent distribution systems, and thermal management systems into a single standardized outdoor cabinet, forming an integrated and pluggable smart energy source product ERAY Energy Source, highly ...

**Promising use of Omani silica sand in energy storage for green hydrogen . MUSCAT:** A key study led by Omani scientists underscores the potential for the Sultanate of Oman to capitalise on the abundance of high-quality silica sand for cost-competitive thermal energy storage - a prerequisite for the large-scale production of green hydrogen and green ammonia in the country.

**MUSCAT:** Nama Power and Water Procurement Company (PWP), the single buyer of output from power generation and water desalination projects in the Sultanate of Oman, is making headway in the implementation

of a strategic study aimed at achieving an ideal mix of energy resources to sustain the country's energy requirements over the next 15 years.
