

Siloxane-based molecular material, by virtue of its unique chemical structure, thermal and electrochemical properties, has triggered tremendous research interest and sparked a ...

Our collection aims to bring together a variety of nanostructured materials including nano doping, nano coating, nanofiber, nanowire, nanotube, nanosphere, nanocages, nanoflower, nanopore, ...

With a conversion step, energy is stored as chemical energy in the electrode and/or the electrolyte solution when electrochemical energy storage and conversion are considered (mode 2 in Fig. 1.1). These basic facts are sketched above in Fig. 1.1. ... Southeast University, Nanjing, China. Rudolf Holze. Authors. Rudolf Holze. View author ...

ZhongJin Group @ Nanjing University. Research. Publications. Members. Gallery. Contact Us. 2024. 270. ... Extended Metal-Organic Frameworks on Diverse Supports as Electrode Nanomaterials for Electrochemical Energy Storage, ACS Applied Nano Materials, 2020, 3(5): 3964~3990. pdf. 131.

Addresses various aspects of electrochemical energy storage; Highlights the practicality of battery and supercapacitor applications in day-to-day use; Discusses the risks of current functional ...

Energy storage material is a hot topic in material science and chemistry. During the past decade, nuclear magnetic resonance (NMR) has emerged as a powerfu ... NMR and MRI of Electrochemical Energy Storage Materials and Devices, The Royal Society of Chemistry, 2021. Download citation file: ... Nanjing University. 163 Xianlin Road. Nanjing ...

From 2007 to 2011, he was a research fellow at the National University of Singapore. Prof. Xia joined Nanjing University of Science and Technology in 2011 and his research interests focus on electrode materials and architectures for all-solid-state thin-film microbatteries, Li + /Na + ion batteries, supercapacitors, and new energy storage systems.

In recent years, graphene has emerged as a promising candidate for electrochemical energy storage applications due to its large specific surface area, high electrical conductivity, good chemical stability, and strong mechanical flexibility. ... Nanjing University of Science and Technology, Nanjing 210094, China E-mail: wangx@njust .cn ...

Jiangsu Key Laboratory of Electrochemical Energy Storage Technologies, College of Materials Science and Technologies, Nanjing University of Aeronautics and Astronautics, Nanjing, 210016 P. R. China. Contribution: Funding acquisition (lead), Resources (lead), Supervision (lead), Writing - review & editing

(lead) Search for more papers by this author

Nanjing University | NJU · School of ... The design of low-temperature electrolytes is a key technology to improve the low-temperature performance of electrochemical energy storage devices ...

Since 2021, Energy & Fuels has established the annual recognition of Pioneers in Energy Research (PIERs) to honor highly influential scientists who have made significant contributions in their respective fields of energy research. Professor Haoshen Zhou from Nanjing University, China, has been selected as the 2024 PIER in the field of batteries and energy ...

Simultaneously improving the energy density and power density of electrochemical energy storage systems is the ultimate goal of electrochemical energy storage technology. An effective strategy to achieve this goal is to take advantage of the high capacity and rapid kinetics of electrochemical proton storage to break through the power limit of batteries ...

Nanjing University of Aeronautics and Astronautics Nanjing 210016, China E-mail: pch060710111@hotmail ; kjzhu@nuaa .cn ... trode materials for next-generation advanced electrochemical energy storage technology duo to their high specific capacity, abundance resource and low cost.[25-27] ...

The ever-increasing demand for high-energy-density electrochemical energy storage has been driving research on the electrochemical degradation mechanisms of high-energy cathodes, among which manganese-based layered oxide (MLO) cathodes have attracted high attention thanks to their low cost and eco-friendly Journal of Materials Chemistry A ...

Electrochemical CO₂ reduction to value-added chemicals and fuels using renewable energy represents as a promising strategy for reducing CO₂ emissions and achieving effective energy storage.

1 Jiangsu Key Laboratory of Electrochemical Energy Storage Technologies, College of Material Science and Engineering, Nanjing University of Aeronautics and Astronautics, 211106, Nanjing, China. 2 School of Energy and Power Engineering, Nanjing University of Aeronautics and Astronautics, 210016, Nanjing, P. R. China. 3 School of Energy and Power ...

Addressing this issue largely depends on design of new energy storage systems with novel electrode architectures. Herein, a novel electrochemical energy storage device called a quasi-solid-state ...

Electrochemical proton storage provides high energy, fast kinetics, safety, and environmental friendliness for grid-scale energy storage. However, the development of pseudocapacitive proton ...

Yuhui Chen's 23 research works with 1,394 citations and 7,439 reads, including: Oxidative decomposition mechanisms of lithium carbonate on carbon substrates in lithium battery chemistries

Jiangsu Key Laboratory of Electrochemical Energy Storage Technologies, College of Material Science and Technology, Nanjing University of Aeronautics and Astronautics, Nanjing, 211106 P. R. China. E-mail: Search for more papers by this author

Electrochemical Energy Reviews >> 2021, Vol. 4 >> Issue (4): 757-792. doi: 10.1007/s41918-021-00112-8. Previous Articles Next Articles Semiconductor Electrochemistry for Clean Energy Conversion and Storage Bin Zhu 1, Liangdong Fan 2, Naveed Mushtaq 1, Rizwan Raza 3, Muhammad Sajid 3, Yan Wu 4, Wenfeng Lin 5, Jung-Sik Kim 6, Peter D. Lund 7, Sining Yun 8

In recent years, graphene has arisen as a promising candidate in electrochemical energy storage application due to its large specific surface area, high electrical conductivity, good chemical ...

Zhong JIN, Professor | Cited by 17,066 | of Nanjing University, Nanjing (NJU) | Read 233 publications | Contact Zhong JIN ... a special class of electrochemical energy storage device composed of ...

It is vital to understand the advantages and disadvantages of nanomaterials for electrochemical energy storage, as well as how to control their synthesis and properties. ... China. Nian-Wu Li received his Ph.D. from Nanjing University of Aeronautics and Astronautics in 2014. After graduation, he worked as a postdoctoral researcher at the ...

College of Materials Science and Technology, Jiangsu Key Laboratory of Electrochemical Energy Storage Technologies, Nanjing University of Aeronautics and Astronautics, No. 29, Jiangjun Road, Nanjing, 210016 P. R. China. Search for more papers by this author

My research focuses on developing new materials and architectures for electrochemical energy storage systems, including all-solid-state microbatteries, rechargeable metal ion batteries ...

Jiangsu Key Laboratory of Electrochemical Energy Storage Technologies, College of Materials Science and Technology, Nanjing University of Aeronautics and Astronautics, Nanjing, 210016 P. R. China. E-mail: , Search for ...

Yuping Wu, PhD, is Full Professor at the School of Energy Science and Engineering, Nanjing Tech University in Nanjing, China. He has published more than 360 papers, won many awards such as Distinguished Youth Scientists from NSFC, China, and was selected as one of the Most Influential Minds from Highly Cited Researchers over the World in 2015.

Zhong Jin. Hybrid lithium-ion capacitors (HLICs), a special class of electrochemical energy storage device composed of battery-type anodes and capacitor-type cathodes, have the ...

Nanjing University of Aeronautics & Astronautics, China BS, Mechanical Engineering, 1987. Nanjing University of Aeronautics & Astronautics, China, MS, Mechanical Engineering, 1990 ... Japan, 1999 . Electrochemical Energy Storage and Conversion Laboratory Department of Mechanical, Aerospace, and Biomedical Engineering. M003 Dougherty Eng Bldg ...

Designing composite solid-state electrolytes for high performance lithium ion or lithium metal batteries. Tengfei Zhang+ * a, Wenjie He+ a, Wei Zhang * b, Tao Wang a, Peng Li a, ZhengMing Sun b and Xuebin Yu * c a Jiangsu Key Laboratory of Electrochemical Energy-Storage Technologies, College of Materials Science and Technology, Nanjing University of Aeronautics ...

Nanjing University | NJU ... (Li-S) battery is considered as an appealing candidate for next-generation electrochemical energy storage systems because of high energy and low cost. Nonetheless ...

New organic electrode materials for ultrafast electrochemical energy storage. Adv Mater, 2019, 31: 1806599. Article Google Scholar ... School of Chemistry and Chemical Engineering, Nanjing University of Science and Technology, Nanjing, 210094, China.

Electrochemical energy storage (EES) devices combining high energy density with high power density are necessary for addressing the growing energy demand and environmental crisis. Nickel oxide (NiO) is a promising electrode material for EES owing to the ultrahigh theoretical specific capacity, but the practi ... Nanjing University, Nanjing ...

The ever-increasing demand for high-energy-density electrochemical energy storage has been driving research on the electrochemical degradation mechanisms of high-energy cathodes, ...
