

Limejump, an energy technology firm and a subsidiary of Shell, will operate the project. David Wells, VP Shell Energy Europe, said: "Flexible storage and supply systems such as Minety have an essential role in balancing supply and demand " especially as renewable power sources become increasingly central to the UK's energy needs."

Nickel Asia Corporation (NAC), through its renewable energy subsidiary Emerging Power Inc., has signed an agreement with Shell Overseas Investments B.V to develop and operate..

Meanwhile, delivered North Asia spot prices, reflected by the Japan Korea Marker, declined by 20% compared with 2019, because of oversupply in the global LNG market and weak demand. Looking ahead, we expect gas markets in North America, Europe and Asia-Pacific to find support from markets recovering from the pandemic.

Technology and Innovation. Technology and innovation are essential to our efforts to meet the world's energy needs in a competitive way. If we do not develop the right technology, do not have access to it or do not deploy it effectively, this could have a material adverse effect on the delivery of our strategy and our licence to operate (see "Risk factors").
