With rising demand to store energy for peak consumption hours or during power outages, utility and energy companies rely on battery energy storage systems to meet these needs. Robinson has been supporting these industries for more than 30 years, providing structural, electrical and design expertise for energy applications.

Some benefits to energy storage systems are the stability of the grid, decreased carbon emissions, increased economic value of renewable sources, and job creation. New types of energy storage systems are being invented every day. Some promising energy technologies include: Rechargeable Battery Platforms; Redox Flow Batteries; Flywheel Energy ...

BESS, or Battery Energy Storage Systems, are systems that store energy in batteries for later use. These systems consist of a battery bank, power conversion equipment, and control systems that work together to store energy from various sources such as solar panels, wind turbines, or the grid. ...
