

There are quite a few 2813-style Chinese movements floating around, but the "DG" indicates "Dixmont Guangzhou", one of the Late 1950's Chinese government run watch manufacturers (AKA - Guangzhou Five Goat Watch Factory), and they make some of the better Chinese movements.

it uses the MingZhu-2813 movement with 28.8k vph which is the best ETA-2836/ETA-2824 Asian replacement movement. There are other 2813 movements like BeiJing-2813, DanDong-2813 but the MingZhu-2813 is the best among all of them. Link to comment Share on other sites. More sharing options... olga. Just an hour ago I finished a 4 month project with a 3804 (GMT of the 2813) movement and I'm super excited. Between ordering the wrong parts, needing a few better tools, messing up a dial or two, I ended up spending much more than the \$280 bp version, I'm super pumped to start the next one.

Many replicas (swiss luxury watches) use this watch movement: DG2813 automatic movement with 21 jewels, 11.5 lines (26,0mm), height 5.40mm, hour, minute, second and date (3). F = 21600 A/h, power reserve 44h. Hand sizes 1.00 / 1.50 / 0.17 mm. Similar in construction as ETA 2824 or Miyota 8215.

[Movement] NH35 vs 2813 - Are the date wheels different? I accidentally bought a dial meant for an NH35 movement, and was hoping to use it in a 2813 build. ... Woodworking is your worldwide home for discussion of all things woodworking, carpentry, fine furniture, power tools, hand tools, and just about anything else about making - anything ...

Power-reserve should be at least 40 hours. The uni-directional winding gives a bit of ratchet noise but it does

## Pearl movement 2813 power storage

its job very effectively. Hand-winding feels like you're doing something wrong, but it should start with a shake anyway.

The DG movement is generally considered one of the better of the 21j movements. I've always believed that the rep factories buy up all the movements that don't pass DG's in house quality checks. If you buy a new movement from a legitimate wholesaler you will be surprised at how much better they run. At least I have been.

Unleash Precision With The Power Of 2813 Automatic Movement: Elevate Your Timepiece Experience! Introduction: In the world of watchmaking, the concept of 2813 automatic ...

I've read a few comments on the Miyota 8 series being too loud, but haven't seen many comparisons between the Mingzhu & Miyota movements. Between the 3 common budget movements (Mingzhu 2813, Miyota 8215, NH35), it definitely seems like the NH35 takes it...but this movement isn't often available in the watch models I want.

The auto mechanism does produce power but not enough if you want to wear it daily to keep you from winding it. ... The movements in the PD-1617 and the PD-1632 are NOT any form of the 2813 movement. They ARE the ST6 movement. I now have three of these models and have put in quite a lot of effort to figure this stuff out.

This is great Bro, just the info that I need for working on an old 2813 movement.....Thanks Dude . Reactions: Dino2018. Automotiveromance Known Member. 8/3/18 106 54 28. 23/7/19 #11 Some tips. Don't use a towel, go buy yourself a watchmaker's workmat. The towel will get lint and dust all over the parts. Also, don't use toothpicks but buy ...

Much of the energy storage within a 2813 movement is primarily made possible through its mainspring. The mainspring works by accumulating tension as it is wound, storing energy that can be released gradually, converting it to kinetic energy that powers the movement.

The 2813 is the 21,600 bph movement. The 4813 is simply a high beat version beating at 28,800 bph. There are exactly the same size. The 2813/4813 is NOT a direct swap for a 2836. L. ... One of my 2813 is very problematic, midnight date shift quickly stopped working, and the watch has only 14-21 hours power reserve. The other is fine for now.

Hi guys, I'm new to the sub and I'm looking at buying a Pagani PD-1662 GMT with a pearle DG5833GMT movement. Looking at reviews the build quality of the watches look great for the price, but I'm a bit worried about the movement. ... the Pearl movement, like many others have stated is just a DG3804B. I've had so many of them and non have and any ...

Professional watch movement, suitable for professionals and watch repair shops. 2. Essential watch parts, easy and convenient to replace the watch movement. 3. Professional 2813 watch movement, fine and exquisite workmanship. 4. Wonderful replacement for old or broken mechanical watch movements. 5.

The 3804B & 2813 are similar but have distinct differences. GMT & Date change layout. The 2813 can be GMT or standard 3 hands, it has a purple coloured wheel on the auto winding bridge, avoid this as it is lesser quality. The cousins supplied 3804B was the best movement out of the 3 I have.

Power-reserve should be at least 40 hours. The uni-directional winding gives a bit of ratchet noise but it does its job very effectively. ... The "DG" designation indicates that the movement was manufactured by Dixmont Guangzhou, however the virtually identical ...

As a result, the Pearl movement stands out as an innovative solution to energy retention, providing a practical response to the growing demand for efficient energy management systems. 3. DURATION OF ENERGY STORAGE. The duration of energy storage is a vital aspect of the Pearl movement that merits thorough examination.

In the past this watch has used either the Seagull ST16, which is good, or the Pearl DG2813. I don't know if Pagni is deliberately trying to fool people by putting Seagull 2813 on the spec sheet. Usually their Pearl movement watches do not sell well.

Nous ne reprenons pas et n'changeons pas les mouvements de montre, selon nos conditions g&n&rales de vente.. Mouvement de montre chinois mod&le DG2813 automatique. Avec une mesure de 25,8 mm de diam&tre, il est profond de 5,87 mm. Gr&ce & un outil horotec aiguilles pour montre - diam. 0.50 et 1.00 rattachez des aiguilles au niveau de l'axe : 1,50 mm pour ...

So I bought a new movement, and found that replacing the dial is more than my skill set will allow, so in working on this, I messed up the new 2813 movement. I have done several mods and one build with the NH35 movement. Question is: will the NH35 fit and work with this case to replace the 2813? Thanks for any help or advice in advance.
