

What is a portable power station?

Portable power stations are basically large batteries in protective boxes, with AC outlets and other charging ports built in. They're generally much bigger, heavier, more powerful, and more rugged than power banks and portable laptop chargers.

How much power does a portable power station provide?

The amount of power a portable power station can provide is measured in watts. When shopping for a portable power station, it's important to consider the wattage you need to power your devices. For example, if you need to power a laptop and a smartphone, you may only need a portable power station with a few hundred watts of power.

How do I use a portable power station?

Using a portable power station is relatively simple, but there are a few key steps to follow to ensure it works properly and lasts for years to come. Charge the battery: Before using your portable power station, be sure to fully charge the battery. This will ensure that you have enough power to power your devices.

Which portable power station should I buy?

If you need your portable power station to support days of off-grid adventure (and maybe backup your home power), check out the Jackery Explorer 2000 Plus. This power station is our favorite heavy-duty option due to its impressive output (3000W max and 6000W peak) and expandable capacity (up to a whopping 24kWh).

How many outlets does a portable power station have?

The number and types of outlets and ports on a portable power station will determine how many and what types of devices you can power. Most portable power stations have at least one AC outlet, which can be used to power appliances that require standard household electricity.

What ports does a portable power station have?

Ports: While you will find certain ports across the board with portable power stations, from AC outlets to USB-A, it is crucial to check the maximum charging rate and supported charging standards to avoid disappointment. You might find USB-C ports, car ports, barrel ports, and maybe inputs for solar, but assume nothing.
