

# Power storage box customization

What is a boxpower containerized power system?

BoxPower containerized power systems are fully integrated with solar power, battery storage, intelligent inverters, and optional generator backup. Expedite your project timeline and reduce costs by leveraging our modular, configurable microgrid solutions. 3.8 kW to 60 kW of PV per 20' container

What is a boxpower microgrid?

BoxPower's flexible,customizable,and scalable solar microgridsare well-suited for a wide range of use cases. Their transportability and lack of reliance on a centralized grid make our microgrid in a box solutions ideal for rural energy generation. Learn more about BoxPower products [here](#).

Can a boxpower system operate as an off-grid energy supply?

All BoxPower systems can operate as a permanent off-grid energy supplyor grid-tied for emergency backup and peak shaving. We begin each microgrid project with a consultation to better understand your priorities - whether that be decarbonization,cost-effectiveness,reliability,or some combination of all three.

What is the difference between Minibox & boxpower solarcontainer?

The MiniBox line offers 3.8 kW of PV with a battery capacity between 7.6 kWh and 30.4 kWh. The BoxPower SolarContainer integrates solar power and battery storage into a renewable microgrid system. Explore solar power solutions from 6 kW to 528 kW.

Why should you choose boxpower?

BoxPower's modularity allows for easy,fast,and cost-effective scaling up. Your BoxPower microgrid specifications can be readily scaled or replicated for subsequent projects as your energy needs grow.

What solar container options does boxpower offer?

BoxPower offers standard SolarContainer optionswhich we configure to fit your needs. BoxPower SolarContainers are highly configurable,with the ability to seamlessly adjust the solar,battery,and inverter capacities to optimally serve your energy loads. Component size ranges for a single container are as follows:
