

# Relocation of energy storage companies in Lebanon

How does energy affect Lebanon's economy?

Energy and electricity demand have weighed heavily on Lebanon's economy. Imported fuel oil accounts for nearly a quarter of the national budget deficit, while electricity demand outpaces power generation capacity. Renewable energy technologies, in contrast, offer the prospect of clean, fully domestically sourced power and heat systems.

Why do we need energy storage solutions in the MENA region?

Dr. Ahmed Ali Attiga, CEO of APICORP, said, "The need for energy storage solutions in the MENA region is primarily driven by ambitious national renewable energy targets and mounting peak electricity demands as a result of accelerating economic development and diversification of the energy mix.

What are the benefits of renewables in Lebanon?

The additional benefits of renewables are summarised in Boxes 2 and 3. The technological advancements in the areas of P2P trading and blockchain promote the implementation of community-scale renewable energy systems which, in turn, can boost the number of small-scale decentralised solar PV systems in Lebanon.

How is Lebanon preparing for future needs?

To prepare for future needs, Lebanon has set out to diversify its energy mix. This started with national action plans to scale up renewables and improve energy efficiency in 2016-2020, with an initial target for solar, wind, bioenergy and hydropower to cover some 12% of primary energy consumption.

Will TPES increase in Lebanon?

The results of the demand projections in the end-use sectors described above and the primary energy demand in the power sector indicate that TPES in Lebanon is expected to increase in the reference case, as shown in Figure 39. The increase in energy demand results in a CAGR of around 2.7% for the total primary energy supply from 2014 to 2030.

Can Lebanese transmission and distribution grid be renewable?

In addition, IRENA's 2017 study, Planning for the renewable future, suggests conducting specialised system studies on the renewable carrying capacity of the Lebanese transmission and distribution grid in different geographical zones, as well as a long-term generation adequacy studies.
