The NES-Store draws its inspiration from pumped hydro storage power stations (PHS), which store energy by exploiting the potential energy of water. However, our solution is free from topographical constraints typically

associated with these plants. The NES-Store system is entirely containerised and modular. This flexibility means that we can adjust the number of containers ...

SERVODAY's Torrefaction Plant revolutionizes biomass energy in Sao Tome & Principe by converting raw materials into high-energy torrefied products. The process starts with receiving and initial processing of biomass, followed by controlled heating in the torrefaction reactor to enhance energy density and storage properties. The torrefied biomass is then cooled and stored for ...
