

## Seiko no 5 power storage time

Is a Seiko 5 a good watch?

It might not be the prettiest in the world, but it's still cool to see -- and it's impressively solid despite its affordable price. The core of modern Seiko 5 Sports are models such as this, which Seiko (sometimes) describes as SKX Style due to its design being based on the iconic SKX dive watch.

Is the Seiko 5 sports a dive watch?

For a little bit of a premium, you can even get a still shockingly affordable automatic GMT. Visually, this is a classic Seiko dive watch with DNA from the brand's iconic SKX line. Does it bother me that the Seiko 5 Sports, like some other popular watches, is styled like a dive watch but is only rated for 100m of water resistance?

What is a day-date complication on a Seiko Watch?

A day-date complication sits at the 3 o'clock position, providing added functionality. The watch is powered by Seiko's reliable automatic 4R36 movement, which has a 41-hour power reserve and can be hand-wound or shaken to recharge.

How good is the Seiko 5 sports?

The Seiko 5 Sports' build and finishing is unmatched at this price, and the case proportions are insanely wearable and ergonomic. The case is brushed on top and polished on the sides (on this particular SRPD91 version). The dial is super legible, with tons of lume and applied indices.

Is Seiko a good brand?

Seiko, founded in 1881 by Kintaro Hattori, is a Japanese watch manufacturer that has become synonymous with quality, innovation, and affordability. The company introduced the first Seiko 5 series in 1963, which quickly gained a reputation for its durability, accuracy, and value.

Can you see the Seiko 4R36 automatic movement through the caseback?

You can see the Seiko 4R36 automatic movement through the caseback. This is the same movement as found in more expensive and well-loved models like the Prospex "Turtle." You can see the movement through the caseback, and this is fun to show your friends, too.

Seiko 5 Sports Collection  
A tribute to Seiko's iconic "Time Sonar" of the 1970s  
Translucent orange dial offering a view of the day/date disk

... Power reserve: approximately 41 hours ...

NH35a vs Seiko 4R35 Seiko's 4R36 movement, similar to the 4R35 and NH35a, with the addition of a day (instead of just a date) complication. The NH35a is essentially an unbranded Seiko 4R35 movement. Along with the 4R36 movement, the 4R35 is the primary modern movement Seiko uses in their entry-level Seiko 5 Sports models.

The Seiko 5 SRPD65K2 is another one of the models from the Seiko 5 Sport collection, this time under the "Suits Style" line. ... a unidirectional rotating bezel for diving purposes, and a power reserve of 41 hours. Overall, Seiko 5 Sense Style models are perfect for discerning watch enthusiasts who are young at heart. Different models under ...

The Seiko 5 has a relatively small power reserve (just over a 38hr) and I've definitely had problems in that range. You only get the full reserve if the watch is fully wound when you stop wearing it. If you have a fairly inactive day and take the watch off early, only a relatively small percentage of the total reserve will be wound.

Thanks, Saswatch. yes, I meant 4-6 months. So, wearing 16 hours per day, it is accumulating about a 20minutes per day deficit. Say  $4 \times 30 = 120$  days  $\times .33$  hours = approx. 40 hours and so no reserve in the main spring at all after that time. The watch is in transit to Seiko so I can't perform the experiment you suggested.

These watches have a smart "hibernation" mode and after a few days stationary go into a low power state, stopping the mechanical movement to save power. The internal electronics stay powered and keep time. Seiko claims 4 years power reserve on the 5J watches, but the date has to be reset upon waking.

The movement beats with a frequency of 21,600 vibrations per hour. It uses Seiko's Diashock shock system. The movement has a thickness of 4.8 millimeters and a diameter of 27mm. It offers a power reserve of about 41 hours and a magnetic resistance of 4,800 A/m. Seiko 5 SNKL23 specifications. Diameter: 38mm; Thickness: 10.5 millimeters; Lug-to ...
