Hybridization with fossil or renewable fuels and Thermal Energy Storage (TES) can be used separately or combined for producing energy when solar heat is not enough to run the thermodynamic cycle of the power unit [6], [147]. To compete with conventional heat-to-power technologies, such as conventional thermal power plants, CSP must meet the ...

The Shouhang Dunhuang 100 MW molten salt solar power tower plant is the first 100 MW-scale commercial demonstration project in China. The plant started to break ground in October 2016, was completed and connected to the grid for power generation in December 2018, and achieved full-load operation in June 2019. This paper comprehensively introduces ...
