

Somalia water storage

Does Somalia have a water storage system?

An important aspect related to the seasonal and interannual variability of rainfall is the absence of any natural surface water storage in Somalia. Water can only be stored in man-made facilities such as berkads, hafirs (dams) and, indirectly, in sand dams. After reaching the surface, rainwater stays behind in and on the soil.

How can we improve water storage in Somalia?

For better water storage across Somalia's drylands, opportunities exist within the Barwaaqo project to deploy low-cost, small-scale water harvesting and storage technologies. For example, sand dams can protect communities, livestock, and crops from flash floods.

Does Somalia have a good groundwater supply?

The development of new groundwater resources in Somalia is fraught with challenges, key among them being poor water quality. The majority of groundwater sources in the country have salinity levels above 2,000mS/cm, which is over the required standard for drinking water.

How many water sources are there in Somalia?

Mapping of water sources in Somalia has been going on for many years. The number of water sources in the country is in tens of thousands, composed of boreholes, shallow wells, springs, dams/water catchments and berkads.

How much groundwater is recharged in Somalia?

Recharge is estimated to be approximately in the range of 3 to 5% of annual rainfall (van der Plac 2001). Jurassic sedimentary rocks in the South of Somalia are likely to be dominated by sandstone. Their groundwater potential is not well known. Groundwater storage and flow may be by both intergranular and fracture flow.

Should Somalia use green and Blue Water Resources?

Water scarcity and climate variability pose significant challenges to Somalia's economic development and the Update presents a compelling case for harnessing the potential of water resources to build resilience and stimulate growth. By effectively utilizing green and blue water resources, Somalia can pave the way for a prosperous future.

When looking for water storage solutions in Somalia, there are many fantastic reasons why you should invest in one of our water tanks. Share. 0. Janke Naude. Related posts. September 15, 2022.
