

Storage fire extinguisher

How do you store a fire extinguisher?

In the event that something does happen, you need your fire extinguisher to work properly and effectively. To ensure this is true, it is essential that you practice the best possible storage techniques. According to the NFPA, fire extinguishers should be stored mounted to the wall at least 4 inches, but no more than 5 feet, from the floor.

Where should a fire extinguisher be used?

Keep a fire extinguisher within reach of your dryer as a result. To stay safe, always empty the lint trap to decrease the chances of a fire starting. I recommend a general-use fire extinguisher near your laundry room. Here is a great choice: Amerex 5 pound Class ABC Fire Extinguisher

Are chemical extinguishers suitable for outdoor storage?

Dry chemical extinguishers are suitable for outdoor storage as they are effective against Class A, B, and C fires. Water-based extinguishers need climate-controlled cabinets, and CO2 extinguishers should be stored with UV-resistant covers.

Should a fire extinguisher be stored upright?

Most modern fire extinguishers are pressurized enough that it does not matter if you store them on their side or upright. The best way to be sure, however, is to check the owner's manual. A non-pressurized fire extinguisher will likely say that it must be stored upright.

Are water based fire extinguishers suitable for outdoor storage?

Water-based extinguishers are suitable for Class A fires, typically involving combustible materials like wood and paper. For outdoor storage, these extinguishers must be placed in climate-controlled cabinets to prevent freezing in cold weather. Stainless steel models offer superior resistance to rust and can withstand various weather conditions.

Are portable fire extinguishers accessible?

In the hands of trained personnel, portable fire extinguishers are the first line of defense against incipient fires, but in order to be useful they need to be accessible. This blog tackles the topic of portable fire extinguisher placement, both how portable fire extinguishers should be distributed and exactly where they are allowed to be placed.
