

The 25MW/100MWh project in Rudong, the company's first commercial grid-scale project using its proprietary EVx gravity energy storage technology, was connected to the grid in December 2023, it announced last week (29 February). It can now start full commissioning of the project. ... Energy-Storage.news" publisher Solar Media will host the ...

A Swiss fund aimed at encouraging institutional investors to get on board with energy storage has reached its first closing at EUR66 million (US\$70.4 million). SUSI Energy Storage Fund, run by investment management firm SUSI Partners, has been invested in by groups including insurance companies and pension funds.

Swiss Life Asset Managers has acquired a 50% stake in BCP Battery Holding, a company with several utility-scale battery energy storage system (BESS) developments in Germany. BCP Battery Holding is a newly-formed platform which, concurrent with Swiss Life's investment, has acquired a portfolio of 220MW of BESS projects in Germany from ...

The Swiss investment group focuses on direct investments in energy transmission and energy generation assets, which can be complemented by investments in energy storage and energy efficiency. The structure of the investment group is unlimited in time and therefore ideally suited to the long-term funding needs of pension funds, as it matches the ...

On 9 September Energy Vault, the Swiss energy storage company, announced a merger with Novus Capital Corporation II, a special purpose acquisition or "blank check" company that listed on the New York stock exchange in February. ... EV claims its LCOE is 60 per cent of that of Li-ion batteries, to be improved to 51 per cent. The initial ...

The latter five projects are being deployed by China Tianying, Inc. (000035:CH), an environmental engineering company, through Energy Vault's license and royalty agreement with Atlas Renewable ...

Stationary battery systems are becoming pivotal in supporting the EV infrastructure. By integrating these systems with EV chargers, we can enhance the charging experience significantly. These batteries store energy during low-demand periods, when electricity rates are lower, and supply this energy to EV chargers during peak hours.

The Swiss Stock Exchange-listed manufacturer of lithium-ion batteries also makes and integrates energy storage solutions for electrified transport as well as stationary energy storage projects. The company has secured CHF59.6 million (US\$63.17 million) in financing from SEFAM, the group of equity and asset fund investors which Leclanché ...

Leclanché batteries at a Younicos project on the Portuguese island of Graciosa. Image: Younicos. Swiss Green Electricity Management Group (SGEM), an investor in energy storage projects, has announced a 20MW / 10MWh battery storage system for PJM Interconnection's frequency regulation market, to be supplied and built by ...

And battery energy storage is one of the best solutions countries are considering to tackle this crisis. As a result, acquisitions in battery energy storage are heating up. As per PVMaganize, about 550 MW of battery energy storage systems (BESS) deals have been signed in the United Kingdom over the past few days.

The corporation is an EV and energy storage solutions designer, developer, manufacturer and seller. Besides, it specializes in installation and O& M of solar power and energy storage systems. ... The Swiss listed company established in 1988 is a leading innovative technologies firm. It serves such sectors as utility, industries, infrastructures ...

Our proprietary gravity technology solutions offer long duration energy storage that is efficient and cost-effective, supports grid reliability, and enables renewable energy integration. We innovate with gravity-based solutions that emphasize performance and durability.

ALACAES is a privately held Swiss company that is developing an advanced adiabatic compressed air energy storage (AA-CAES) solution for large-scale electricity storage. ALACAES' patented technology uses caverns in mountains as the pressure chamber and a proprietary thermal energy storage technology to achieve an overall round-trip storage efficiency in ...

Marco Terruzzin, Ph.D. has served as Energy Vault's Chief Commercial and Product Officer since 2022. Prior to Energy Vault, Dr. Terruzzin served as Director of Energy Storage for RWE Renewables from 2017 to 2019. Prior to joining RWE Renewables, Dr. Terruzzin served as Head of Energy Storage Edge Platform for Stem from 2016 to 2017.

Small-scale flow batteries are already emerging for home energy storage, and one Swiss company, nanoFlowcell, ... In 2019, the company unveiled its QUANTiNO test EV, which used an earlier version ...

Veloce Energy accelerates electrification by developing a transformative grid edge infrastructure to deploy and operate EV charging and commercial and industrial storage easier, faster and at low cost. The Veloce Energy VPort(TM) is an intelligent, modular, and scalable battery energy storage system (BESS) that is flexible, safe, and reliable.

All five EVx projects have an estimated 3.26 GWh capacity and more than \$1b in value. Swiss-based energy storage producer Energy Vault Holdings, Inc. has deployed five new EV gravity energy storage systems (GESS) in China.

The Swiss power plant, constructed by the company Nant de Drance, will be put into operation on July 1st.

The plant has six pump turbines and a total power output of 900 MW, enough to power as ...

Toshiba's efficient, durable energy storage solution utilises peak load and stability controls. #3. Tesla. Established back in 2003, Tesla has grown to become one of the most recognisable brands in the world, operating in the EV

The world's biggest oil and gas company has taken a stake in Swiss energy storage company Energy Vault, allowing it to accelerate the deployment of its "gigawatt scale" storage that can ...

The world's first grid-scale EVx(TM) gravity energy storage system (GESS) has entered the first phases of commissioning. Energy Vault Holdings, a firm that delves in ...

The objective is to improve the life cycle of these products by reusing them for energy storage or by recycling them more efficiently. SBTC focuses its research activities in several areas, ...

3 · The company is also working with Hainan, an island province off China's southern coast, on a long-term project that would combine energy storage with solar and offshore wind ...

Tricera Energy exhibiting at Intersolar / ees Europe in Munich last month. Image: Cameron Murray / Solar Media. German battery energy storage system (BESS) project developer Tricera Energy has been able to build its business thanks to "second use" battery modules from the country's automotive sector, its COO told Energy-Storage.news.. The Dresden ...

EVESCO energy storage systems have been specifically designed to work with any EV charging hardware or power generation source. Utilizing proven battery and power conversion technology, the EVESCO all-in-one energy storage system can manage energy costs and electrical loads while helping future-proof locations against costly grid upgrades.

According to the Leclanché release, this means the batteries can last a minimum of 15 years. The Swiss company, which also has facilities in the US, said it supplied the full battery energy storage system (BESS), along with inverters and energy management system (EMS) which monitors and controls the battery system.

A pumped hydro energy storage (PHES) plant with a capacity of 20GWh in Valais, Switzerland will begin operations on Friday 1 July. ... Swiss national railway company SFR is the next biggest with 36%, followed by utilities Industrielle Werke Basel (IWB) with 15% and Canton-owned FMV with 10% of a total share capital of CHF350 million.

Water isn't the only way to store energy, though. American-Swiss startup Energy Vault designed a giant mechanical energy storage system that uses gravity and 35-ton bricks to store and generate ...
